Research Proposal Template

Title: [Title of the Research Project]

Principal Investigator (PI): [Main Investigator's Name, Affiliation and Email]
Co-Investigator(s):
[Co-Investigator 1's Name, Affiliation and Email],
[Co-Investigator 2's Name, Affiliation and Email],

---

1. Introduction: (100-150 words)
Provide a concise overview of the research problem, its significance, and the objectives of the proposed study.

2. Literature Review: (max. 500 words)
Summarize key literature relevant to the research topic, highlighting existing gaps, debates, and the context of the study.

3. Research Questions/Hypotheses: (max. 70 words)
Clearly state the research questions or hypotheses that the study aims to address.

4. Methodology: (100–150 words)
Detail the research design, data collection methods, tools, and analytical techniques to be employed.

5. Expected Outcomes: (max. 150 words)
Describe the anticipated findings and contributions that the research aims to make to the field.

6. Timeline:
Provide a timeline outlining the various phases of the project, from data collection to analysis and reporting.

7. Responsibilities and Benefits:
Roles and Responsibilities
*Please provide a detailed description of the **responsibilities** of each member.*

No	Name	Role	Responsibility

*Please provide a detailed description of the **benefits** for each member.*

No	Name	Role	Benefit

8. Ethical Considerations:
Outline any ethical considerations related to data collection, participant consent, and confidentiality.

9. Budget and Resources:
Provide an estimated budget for research-related expenses, such as materials, equipment, and participant compensation.

10. References:
List the references cited throughout the proposal.

Conclusion:
Summarize the main points of the proposal and reiterate its significance.

Appendices:
Include any additional materials, such as research instruments, consent forms, or relevant charts/graphs.
