Subject Line: Create Inspiration and Motivation on Demand!!

We all have ruts. Every single one of us has experienced some version of writer's block, where creativity just won't happen.

It sucks. Not having enough energy to create means that your productivity drops. And for someone like you, that means your income drops too.

What if there were a way to find inspiration at the EXACT moment you need it?

Imagine how much you can accomplish if you had a way to optimize your creative flow - to not only have **more ideas** but **more clarity and focus** to execute.

Imagine finishing work tasks that usually take all day in a single morning.

Subject Line: Stop Just Wishing for Success and Manifest Your Potential!

What if You're Potential Never Manifests Itself!?

You've been told about how much "potential" you have since you were a child. You **assumed** that as you got older, that potential would manifest itself into success.

But it didn't.

Instead, life got harder and you began running in circles, doing the same things you did the year before with little progress towards this so-called "potential".

You've probably had some killer business ideas too - ventures that would fully utilize your growing skillset, challenge you into growth, and return to you riches beyond anything you've experienced so far.

That's what was SUPPOSED to happen for you, right?

Absolutely!

But those ideas will remain WISHES until you've refined your **mind** enough to have a higher quality of focus, clarity, memory, and drive.

Your mind has to be "turned on". That's what your parents and teachers couldn't do for you. And that's why you have such a hard time manifesting your potential.

If you're done running in circles wishing for success and are ready to evolve your mind to become actually capable of manifesting your highest potential...

Then click here to learn more about this unique science-based tool that can literally upgrade your brain in a matter of weeks.

P.S. Right now the company behind this tool is running a once-a-year special discount. Make sure you get in on this!

Subject Line: I was just about ready to give up...

When you don't feel like you're enough, it's hard to stay inspired and motivated.

I'd been working on my first real business venture.

I spent years tenaciously learning about marketing and finally felt prepared to get clients and serve them to the best of my ability.

I found very quickly that the best of my ability didn't actually amount to much.

It wasn't my skillset. I was very clear about what needed to be done and even got some results for the few clients I did manage to obtain.

But I wasn't getting enough work done to raise the bar - to grow my business.

I started to think I was just lazy. Maybe I should just get a job?

But no way! I'm the first in my family and one of the few of my friends to actually take the initiative to learn a new skill and start a business.

I realized the problem was my brain.

I (and probably you too) grew up in what some call the "Age of Distractions".

A life of screens, easy dopamine, and instant gratification left my brain unable to focus for long periods of time, created a constant "fog" that made it hard to think clearly, and made it nearly impossible to do HARD things without giving up part of the way.

So my ability to actually sit down and create was highly limited - which meant my growth in business was highly limited.

Realizing this truly hurt...

I felt powerless. I didn't want to go through years of meditation or therapy just to be able to focus better and be more productive.

That voice again, "Should I just get a job?"

If the problem is my brain, how long is it going to take to actually FIX it?

Well, it actually didn't take long at all. Within a month of finding this solution, I had started getting more done than I ever had in my LIFE.

Tasks that would take me an entire day, started to get completed within the morning. It finally felt like my business was actually growing!

Discover the tool I used to 10X my productivity in just a month by enhancing my brain and increasing my **Focus, Clarity and Drive**.
