

Synergy 3.0

Overview

This document describes the various ways a player may engage with the Synergy system in order to earn Rank Points, which may also lead to \$KDR rewards. The contents of this document are subject to change as the Synergy system is developed and updated.

Synergy System

This system enables players to use multiple NFTs together in order to generate additional Rank Points for the Kaidro Chronicle leaderboards. Different attributes of each NFT type will contribute in different ways to increase the total Rank Points accumulated. Rank points are accumulated at the end of the **7 day period**, and are rounded to the nearest whole number. Synergy is calculated using the following formula:

$$(PilotPoints + SparkSuitPoints + SpiritGuardianPoints) * (1.0 + ClanBonus + ColorBonus)$$

A player may use a Spark-Suit and a Spirit Guardian together, or a Spark-Suit, Spirit Guardian, and Pilot together in the Synergy system. **NFTs must be of the same Clan for Synergy**. Each NFT type generates a specific amount of base "Rank Points". These points are determined by the "Tier" of that NFT; these points are listed below.

Base Points per Tier

Spirit Guardian NFT

Runner	5
Adept	10
Officer	15
Master	20
GrandMaster	30
Lord	45

Spark-Suit NFT

Runner	10
Adept	15
Officer	20
Master	25
GrandMaster	35
Lord	50

Pilot NFT

Runner	15
--------	----

Adept	20
Officer	25
Master	30
GrandMaster	40
Lord	55

Bonus Multipliers

In addition to the Base Points accumulated by the systems, Synergy also applies multipliers to increase these points based on specific attributes of the NFTs used. All multipliers are accumulated into a single multiplier value, before being applied to the base points.

Clan

If a player uses 2 out of 3 NFTs that have matching Clan attribute, it will allot them a +10% multiplier

If a player uses 3 out of 3 NFTs that have matching Clan attribute, it will allot them a +20% multiplier

Color

If the player has 3 NFTs with the same Color/Color Theme attributes, then a color multiplier will be granted based on the value of that attribute. These multipliers are listed below.

Bubblegum Violence

Harlequin Tonic:	10% bonus
Tumblers Mule:	15% bonus
Mime Burst:	20% bonus
Black and Gold:	20% bonus

Grimbone

Scorched Earth:	10% bonus
Sun Rise:	15% bonus
Dark Side:	20% bonus
Black and Gold:	20% bonus

Emerald Hand

Elite Corps:	10% bonus
Emerald Palace:	15% bonus
Elegance:	20% bonus
Black and Gold:	20% bonus

Example Calculation

3 Bubblegum Violence NFTs, all of Master Tier, and all of the Mime Burst color would have the following calculation

$$(20 + 25 + 30) * (1.0 + 0.20 + 0.20)$$

$$75 * 1.40 = 105 \text{ points}$$
