

Privacy Policy for QAA Connect

Last updated: 2026

This Privacy Policy explains how QAA Connect, a mobile application published for Quality Assured Audits Ltd, handles information when you use the app.

Overview

QAA Connect is designed to work entirely on your device. The app does not require an account, does not require you to sign in, and does not require an internet connection to function. We do not operate any server that receives, stores or processes information from this app, and we do not sell, rent or share any information with third parties, because no information leaves your device.

Information Stored on Your Device

The app stores a small amount of information locally on your device using standard Android storage mechanisms, so that your choices are remembered between sessions. This includes the consultation date and time you select on the booking screen, and the answers you tick on the audit readiness self-assessment screen. This information stays on your device, is never transmitted anywhere, and is automatically removed if you uninstall the app or clear the app's data through your device settings. You can also clear your booking or self-assessment answers at any time from within the app.

Information We Do Not Collect

The app does not collect your name, email address, phone number, physical address, location, contacts, photos, device identifiers, advertising identifiers or any other personal information. The app does not include advertising, analytics software development kits, crash reporting services, or any other third-party tracking technology.

Permissions

The app does not request sensitive runtime permissions. When you choose to call the company, send an email, view a map location, or add an appointment to your calendar, the app opens your device's own phone, email, maps or calendar application using a standard system action. Any information you enter into those separate applications is governed by their own privacy practices, not by this policy.

Children's Privacy

The app is intended for general business audiences and is not directed at children. We do not knowingly collect any information from children, and as explained above, the app does not collect personal information from any user.

Data Retention and Deletion

Because all data described above stays on your device, you are always in control of it. Uninstalling the app, clearing its storage, or using the reset options inside the app will remove this locally stored information.

Changes to This Policy

We may update this Privacy Policy from time to time to reflect changes in the app's functionality. Any updated version will be made available together with the app.

Contact Us

If you have questions about this Privacy Policy, you can contact Quality Assured Audits Ltd using the contact details shown in the Contacts section of the app.
