Create a Turnitin Assignment

Description

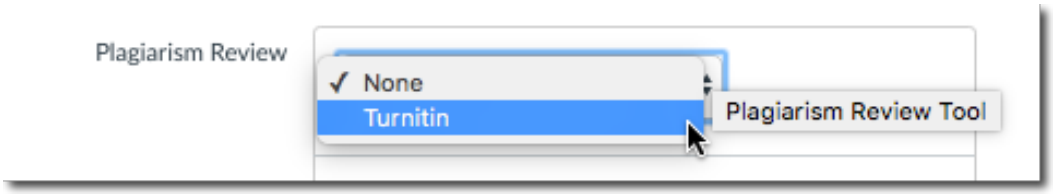

The current integration of **Turnitin** with Canvas allows instructors to **automatically** check for plagiarism once students submit a **File Upload or Text Entry** assignment. All configuration is done completely within Canvas and requires just a few clicks!

Create and Configure Canvas Assignment for Plagiarism Detection

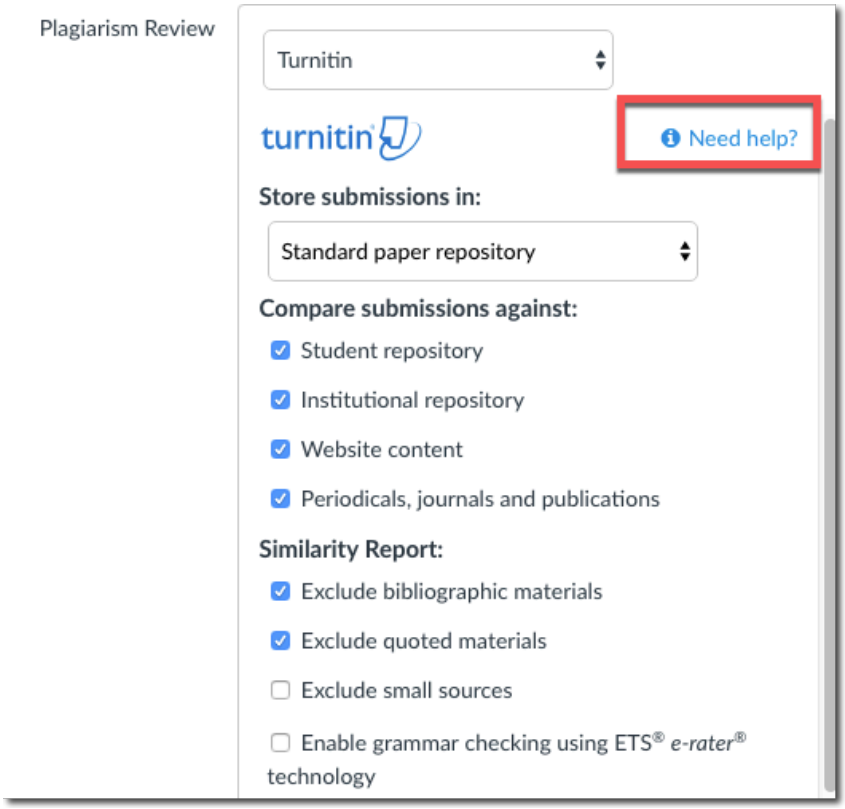

1. Once in your course, select **Assignments** → **+Assignment**
2. Configure your Assignment **Submission Type** to **Online [1]** and check the box for **File Uploads or Text Entry [2]**

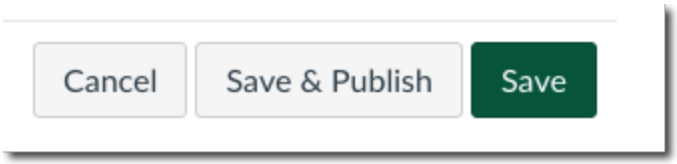

3. Next, scroll down the page and select **Turnitin** from the **Plagiarism Review** drop-down menu

4. Once you select **Turnitin**, the full Turnitin menu of configuration options will display. Go ahead and inspect these. Most of the time, the default settings will be sufficient. For full details on what these settings do, click the **Need help link** or refer to this document

5. Next, select **Save or Save & Publish.** Your **Turnitin Assignment** is now ready for student submissions.

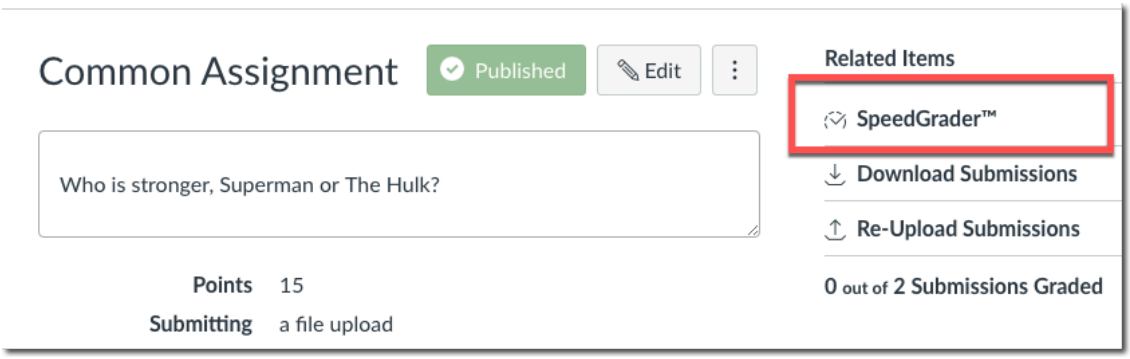

View Student Submission Reports

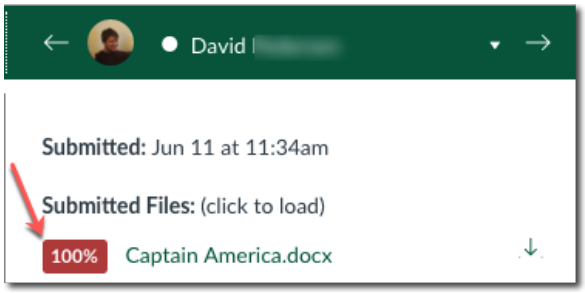

Once students submit their papers through the Canvas Assignment, Turnitin will generate the Similarity Report and generate links to **Turnitin Feedback Studio**, usually within a few minutes. The Similarity Report is accessible in a few different places in Canvas.

Through the Speedgrader

1. Select **SpeedGrader** from the right-hand side of the assignment.

2. To view your **Similarity Report** in **Turnitin Feedback Studio**, select the similarity percentage from the right-hand side of SpeedGrader (in the example, this is a red 100%).

Note: If you're having trouble opening **Turnitin Feedback Studio**, check your pop-up blocker settings and create an exception. Alternatively, if a similarity percentage is not yet available, your report may not have generated.

Through the Gradebook

1. The Turnitin Report icon will appear next to each student grade or submission icon in each assignment column.

2. To access the actual report, follow the link to get back to the Speedgrader

How Students View Their Submission Reports

1. Once students submit their paper and Turnitin generates a Similarity Report, students can access this report by selecting **Grades [1]** and then clicking the **Similarity Report icon [2]** for the assignment.

2. Students can also click the **Assignment title [3]** to see the **Submission Details Screen**. Here they will see a link to the **report[4]** as well as a link to view annotated comments or any other instructor **feedback[5]** for the assignment.
