

Dear parents,

Over the past couple of weeks, our LS students have begun work with a new app called Reflex Math. The goal of the program is to help students develop their fact fluency, their automatic recall of simple math facts.

We have been practicing in class and now Reflex Math is coming home! The goal of each student is to play the online math game until the screen turns green (they know what this looks like). Depending on your child, this should take between 15-20 minutes.

The program tracks progress so that students are always moving forward in their development of fluency.

For an iPad or iPhone:

To log in at home please have your child log in using their QR code found in their Orange homework folder using the steps below:

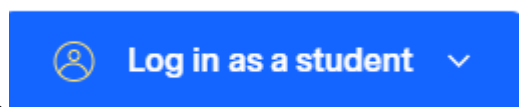

1. Download the Clever App ([Apple iPad](#)) from the App store (android devices do not support this app)
2. When prompted, scan the QR code.
3. Under “more apps” click on the orange “ExploreLearning” app (They know how to do it!)

For an **Android device, a Chromebook or a computer**, please make sure your device is equipped with a WebCam and then follow these directions:

1. Go to <https://www.clever.com/> on your Web browser
2. Select LOG IN AS STUDENT

3. Click on Clever Badge Login

4. Allow your webcam and scan in the QR code from the Orange HW folder
5. Under “more apps” click on the orange “ExploreLearning” app (They know how to do it!)
