

Professional Development Plan Day 2

Topic: Math Factors and Products

Date: March 7, 2023

Teacher: Brianna Kutas

Observer: Cam Matus

1. Professional Goal Use technology in my instruction (smart board)	2. Steps to Achieve Goal I plan on using PowerPoint on the smart board as a way to work through notes and problems with students. I will be using the arrow features directly on the smart board to switch from slide to slide. I plan on using the different colour functions of the pen when switching between concepts in the notes. I will write clear and large enough so that students can see my writing.
---	--

3. Instructions for Observer (Be Specific)

- Keep note if there is anything that I struggle to use or if there is ever a time that you have to assist me with a smart board function
- Notice if my writing is clear and a good size that all students are able to see, as well as if this writing is consistent or not
- Keep note of my use of the different coloured pen options and the eraser function if used
- Notice if I am able to switch between slides efficiently
