

My Work

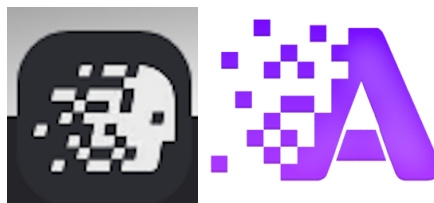

Graphic Design 3 Years Photoshop

I created this logo for a client in photoshop by using simple techniques to transform a font into a brand identity.

This thumbnail was made for a logo guessing game. I took existing brand logos and removed different elements to achieve the "brandless" look.

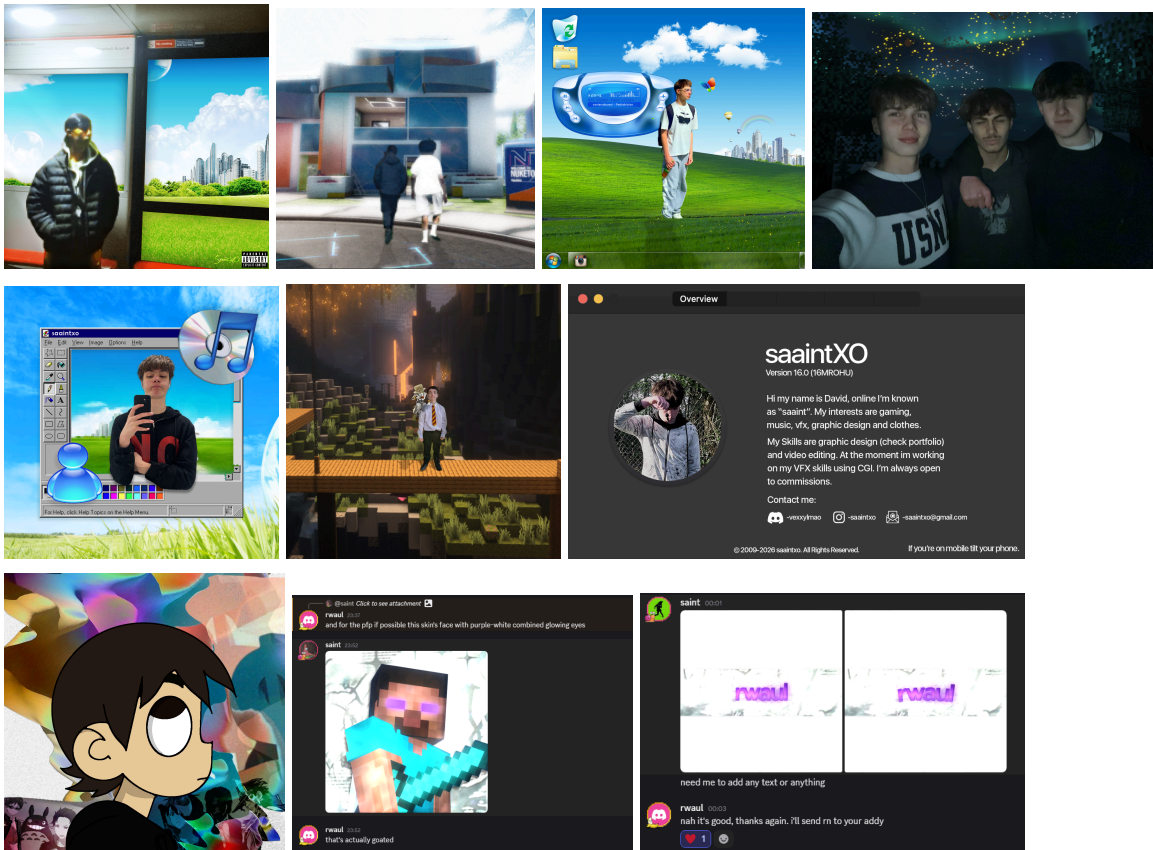

Created this logo for a client who gave me the first image as reference.

I have lots of experience in making youtube thumbnails especially for minecraft related content.

More photos i created in photoshop either for fun or for someone else:

VFX 3 Years Premiere Pro / <1 Year After Effects

Music video for Tyzenitro, made in after effects sequined in premiere.
