Roteiro

1) Start

(...) Informações de contato.

2) Grant type

Grant Type *

Conference

Grant Title *
Example: The fifth annual PyCon Atlantis

Python Brasil 2022

3) Proposal

Date *
Provide the start date for your event/project

17/10/2022

Event's/project's website *
Please provide a link to your event's/project's website(s).

https://2022.pythonbrasil.org.br/

Requested Grant Amount (USD) *

27.000

Grant Amount Breakdown *
What amount are you requesting from the PSF? If the grant is funding several components of a project/event, please provide a breakdown of what the funding will be used for. Example: Our event is requesting $1500 total ($1000 for captioning/transcripts, $500 for improved internet bandwidth for speakers).

Python Brazil is requesting $27.000 total:

- US $ 10.000 or | R$ 50.00,00 for remote transmission

- US $ 3.866 | R$ 20.000,00 for captioning/transcripts

- US $ 1933,19 | R$ 10.000,00 for improved internet bandwidth for speakers.

- US $ 12.000,00 | R$ 62073,60 for Python Brazil Scholarship program

Budget *

Please include a link to a budget for the event or project work. This should show us an overview of all expenses and expected revenues. If you need to submit the budget via a document, please note that here and attach the document once you get to the "Other" section of this application.

Budget and Revenues (until now):
https://docs.google.com/spreadsheets/d/1DUNSCZowwMtoT--jeGkgeY7Ef6eq5EjZ/edit?usp=sharing&ouid=116926693741278576449&rtpof=true&sd=true

Objective *

What is the objective of your event/project?

Brazil is a continental country, it has a great distance between the states and the cost of transport can be very high. Historically, few people from the northwest can participate in other editions of Python Brasil because of this expensive mobility costs. Therefore, organize this event in Manaus, Amazonas (middle of the Amazon Rainforest) will bring development to the communities that are furthest from the economic center of the country, in addition to the regularly participating public. Beyond that, the main objectives of Python Brazil 2022 are:

- Spread the Python language;

- Promote the exchange of experiences and knowledge;

- Encourage community growth impacting the region economically and socially.

Beneficiaries *

Provide a description of the beneficiaries of this grant. If this request is for a sprint or virtual event, please tell us how many people are expected to attend. (e.g. if the grant is for a Python User Group (PUG) event, state the size of the group, the anticipated size of the event, and who in particular from the PUG benefits from the grant).

In 2022, after two years with online editions, we expect to hold the largest Python Brazil with the hybrid model! We expect around 1000 in-person participants and 15,000 online participants. Our audience is mainly composed of people in the areas of development, software engineering, business, IT management, academics, students and enthusiasts.

Regional Support

If you have funds remaining after your [event/development/etc], how do you plan to use them? For example: will your organization use remaining funding to help support regional Python efforts? Will remaining funds be saved for the next event? If so, please tell us about it!

We're going to continue to support the Python community in Brazil. All funds remaining after the events are going to be sent to Apyb (Python Brazil Association).

4) Conference

5) Workshop e 6) Meetup.com

Não estão incluídas na categoria *Conference*.

7) Other

Link to Code of Conduct *
Provide a link to your code of conduct. We require that your code of conduct be listed on the event website as well. Meetup.com Requests: a link to, or the full text of your CoC must be in the "About" section of your Meetup page, or we cannot send you an invite to the PSF Meetup Group.

https://2022.pythonbrasil.org.br/cdc

Percentage of Python *
What percentage of your event/project will concentrate on Python?

We will concentrate 95% on Techincal matters (Python subjects) and 5% in Non-technical matters (Mental health, education, career, communities, between others).

Follow-up activities *

Provide a description of the planned grant follow-up activities. If this grant is approved, we will send you a link to our report form. In addition to that, we want to know how post event/project information will be shared with the community. This could be blog postings, post-event write-ups, web pages, project updates, where recordings will be posted, etc.

Under the current scenario we seek to resume face-to-face events by planning safely and at the same time appreciating the lessons learned in the last two editions (2020 and 2021), held remotely. Therefore, we will be streaming live all talks, keynotes, roundtables and lightning talks. In addition, we will also have Job Fairs both in-person and remotely. We also want Python Brasil to continue to be and become more and more inclusive. In view of this, the event will have Libras (Brazilian sign language) interpreters and simultaneous Spanish-Portuguese translation in talks, keynotes and roundtables, a space for children, a baby changing room and a family space. Therefore the activities are:

Talks: Most of the talks given are chosen by the people who make up the community. These address themes in the most diverse areas of knowledge using the Python language. Added to this scenario is the presence of a Track for Spanish speakers, strengthening the relationship between Latin American communities. In addition, invitations will be made to prominent people in the community, the Keynotes, who will share their experiences and show the trends and future of Python.

Roundtables: Discussion circles where relevant topics to be debated in the community are addressed, usually containing people with expertise in the chosen topics.

Tutorials: These are mini-courses in various formats that address Python and related technologies, in which those who participate can develop new skills by putting what they have learned into practice.

Sprints: Sprints are a Python community tradition. It is a time when people who participate have the opportunity to interact and contribute together to improve open source projects with the presence of project maintainers.

Lightning Talks: Moving away from the traditional model, the lightning talks are

short, objective and spontaneous presentations made by the participants. A great opportunity to encourage dialogue and share experiences among people in the community.

Open Space: It is an important way of interaction for the event, where anyone can open dynamic spaces for the exhibition and debate, without the need for a pre-established schedule.

Kids Space: It is a space dedicated to children with the support of caregivers

and entertainers. The goal is to provide a safe and fun place for

children whose parents want to participate in the event.

8) Preview

Preview Submission informations.

I apologize, Olivia! Our request is $27,000 USD because we're going to reserve $12,000.00 USD for the Financial Aid program that will help the participation of 17 people from many cities from Brazil. This program will buy tickets, provide a hotel room at Manaus/Amazonas and airplane tickets to this group. You can see more information about it on our website https://2022.pythonbrasil.org.br/programa-auxilio-financeiro

I adjusted the spreadsheet to fit with the requested information, captioning/transcripts is about the Service to translate Brazilian Sign Language and Translation Service English/Spanish to PT-BR (Hourly rate), both are on the cells B24 and B25 on the Summary sheet. Also, the information about financial aid program is on the cell B28

The remote transmissions are on B20, this service includes sound, projection and all infrastructure to make the live show on YouTube.

Our final request is $27.000 that will be used to get more accessibility and help minority groups to participate in the Python Brasil.

US $ 10.000 or | R$ 50.00,00 for remote transmission
US $ 3.000 | R$ 15.740 for Service to translate Brazilian Sign Language/ Translation Service English/Spanish to PT-BR (captioning/transcripts)
US $ 2.000 | R$ 10.000,00 for improved internet bandwidth for speakers.
US $ 12.000 | R$ 60.000,00 for financial aid program
