

Our Riley story began a little over 7 years ago, before Jameson was born. We learned during the pregnancy that he had some complicated birth defects and that if he survived the pregnancy and birth he would have to have many surgeries and hospitalizations over the course of his life.

From the first moment that the Maternal Fetal Medicine Specialists at Riley took over our prenatal care, we knew we were in the best hands. That confidence has been solidified by every specialist and surgeon that has cared for him through 15 hospitalizations and 11 surgeries so far in his almost 7 years of life.

We are so grateful for everything Riley has done for Jameson and our family that we have welcomed and embraced any opportunity to advocate for the incredible work they do.

Jameson loves superheroes, transformers, playing games, basketball, soccer, baseball. He is so excited for IUDM this year!
