## Declaration of Compliance with Open Science

Through this document, the authors inform RBPEC about the manuscript's compliance with Open Science communication practices. Authors must state: (a) authorship responsibility; (b) whether the manuscript is a preprint and, if so, its location; (c) whether the data, program codes, and other materials underlying the manuscript text are properly cited and referenced; and (d) whether they accept openness options in the peer review process.

### Regarding the Responsibility of Manuscript Authorship

I/We declare authorship of the manuscript "TITLE", submitted to the journal Revista Brasileira de Pesquisa em Educação em Ciências (RBPEC), considering the norms for the maximum number of authors (four). Contributions must be identified by the CRediT Taxonomy (The Contributor Roles Taxonomy).

I/We also declare that I/we agree to the publication of the aforementioned article under the terms of the [CC-BY 4.0 License](#) adopted by Revista Brasileira de Pesquisa em Educação em Ciências. I/we publicly acknowledge my/our responsibility for the content and originality of the text, in whole or in part. Finally, I/we declare the absence of any personal, commercial, academic, political and/or financial conflicts of interest in relation to this article.

**About the Preprint Manuscript**

Is the manuscript a preprint?

- Yes

Preprint Server Name:

Preprint DOI:

Note: Manuscript deposited on a recognized preprint server.

- No

### Regarding the Availability of Research Data and Other Materials

It is recommended to make information about the content (data, program code, and other materials) underlying the manuscript text available before or at the time of publication. For sharing, the author(s) may use their institution's repository, as well as identify relevant and certified repositories, such as the multidisciplinary repositories: [SciELO Data](#), [Zenodo](#), [Figshare](#), among others. Exceptions are permitted in cases of legal and ethical issues. This recommendation aims to facilitate the manuscript evaluation process and, if approved, contribute to the preservation and reuse of content and the reproducibility of research.

**Are the underlying contents of the manuscript text already available in their entirety and without restrictions, or will they be available at the time of publication?**

- Yes, all the underlying content of the research text is contained in the manuscript.
- Yes, all content will be available at the time of publication of the article.
- Yes, all content is already available. Below is/are the title(s) and respective DOI/URL(s) of the data underlying the article text. \_\_\_\_\_

---

No, the data and/or materials will be available after publication upon request from the authors, as justified in the manuscript.

No, the Research Data cannot be made publicly available. Justify below: \_\_\_\_\_

### Regarding Openness in Peer Review

Authors may choose one or more methods for initiating the peer review process: **if the manuscript is approved and the option is offered, do the author(s) agree to:**

a) the publication of the reviews in the format of a peer-review article?

- Yes
- No

b) interacting directly with the article reviewers?

- Yes
- No

### Regarding Ethical Considerations in Research

Revista Brasileira de Pesquisa em Educação em Ciências is based on: the “Principles of Transparency and Good Practices in Academic Publications” recommended by the [Committee on Publication Ethics — COPE](#); the principles of the [Directory of Open Access Journals — DOAJ](#); and the recommendations of the National Research Ethics Committee (CEP/CONEP) in its [Resolution No. 510/2016](#).

For the manuscript evaluation process, we inform you **that the Ethics Committee protocol number should NOT appear in the evaluation version** to avoid identifying the author(s), but it should appear in the final version if the manuscript is accepted. For researchers abroad, consult the equivalent document or contact the [Editorial Team](#). In this case, the editorial team will verify the characteristics of the Ethics Committees in the country where the research was developed, provided that the ethical procedures are followed.

## 1) Manuscript Classification:

- Empirical with human subjects  
 Empirical without involvement of human subjects  
 Theoretical

 2) Ethics in research with human subjects (*answer **only** if the manuscript involves empirical research with human subjects*). Does it have approval from an Ethics Committee?

- Yes. The document proving approval from the ethics committee is attached to the Journal's System at the time of submission.  
 No. Justify the reasons why the work was not submitted to an Ethics Committee and describe the ethical procedures adopted in the research: \_\_\_\_\_

**Regarding the use of Artificial Intelligence**

Following ethical standards regarding knowledge production, report:

## 1) Regarding the use of Artificial Intelligence tools in the preparation of the manuscript and development of the research, I inform that:

- Yes, I used an Artificial Intelligence tool to organize the bibliographic references according to RBPEC standards.  
 Yes, I used an Artificial Intelligence tool to translate the abstract and title into English and/or Spanish.  
 I did not use an Artificial Intelligence tool in any part of the manuscript.

As proof of the above, all authors sign in the order of appearance in the manuscript and declare their contribution to the manuscript.
