Hudsonville Public Schools strives to promote and maintain a safe and healthy school environment. As district nurses we work closely with students, parents, staff, and providers to ensure the health and well-being of our student population. If your student has a medical condition requiring medical care at school, we are here to assist you!

Kristen

I have been an RN for 'twenty-something' years and a school nurse for the Hudsonville district for 4 years. My favorite thing about school nursing is that every day is different and I love being an advocate for both students as well as school staff in navigating health and medical issues in the school setting.

Outside of work, you may find me in a gym watching my daughter play high school volleyball or my son play college basketball. I also love to play pickleball and to listen to books on tape since I spend a lot of time driving.

Kaylee

I have been a nurse in the Hudsonville district since January 2023. Prior to that I worked as a nurse in the pediatric ICU. I love getting to ensure a student's medical diagnosis does not hold them back while at school.

When I am not at work, you will find me traveling, running, or spending time with my husband and sweet bernedoodle, Annie.
