

BRC Solar Donation Station

The Solar Donation Station is a new initiative to support Black Rock City participants in making the shift to renewable energy by providing free access to donated solar panels and components. By creating a central on-playa station for donation, distribution, and peer-to-peer education, we aim to reduce reliance on fossil fuels, make solar more accessible to camps of all sizes, and foster a culture of sustainability through community engagement. This program is part of our broader commitment to a Net Zero BRC and supports our 2030 Sustainability Roadmap.

- When: 10am- 2pm...08/21/25- One day before the event until 1 day after the event.
- Where: **Burners Without Borders (BWB) Camp at 6:45 and Esplanade**. There will be a Solar Program container there with the stock of donated panels available for participants. Please ask for a Solar Rep when you come to BWB! Please reach out early with requests... [Solar Program Panel Donations Inventory](#)
- What: We have a variety of donated solar panels available for participants who have ideas and projects that can use solar panels. You are welcome to take what you think you can use, and if you find that they should be a permanent part of your camp, we can talk about it!
- How: Come by BWB if you are in need of or just curious about Solar possibilities! You can take some knowledge and some solar panels with you! Please have a plan for transportation of the panels to your campsite.
- Why: We have had a number of requests from both sides of the aisle regarding donation and distribution of solar panels and associated equipment. This is the beginning of a plan to help support participant exploration into the renewable energy world.

⚠ We are only accepting/ distributing equipment in good condition, with no visible damage or significant wear.

📧 For donations or inquiries, contact Matthew "Starchild" Deluge, BRC Solar Manager at starchild@burningman.org.

💙 Don't have materials to donate but still want to support? Contribute through our [donation portal!](#)
