

## Tips and Tools For Educators

As always you can check our solutions database in our help desk system to search and find helpful articles located here - [UCF Help Desk Knowledge Base and Solutions](#)

- **Tools for Educating Students through Distance Learning**

UCFSD offers a variety of online tools to help with distance learning. Tools include, but not limited to the following:

Google Classroom

Canvas LMS

Google Apps for Education (Gmail, Drive, etc...)

Google Meet

Clever

Choosing which tool(s) to use is a decision made by your school building, grade level chair or individual educator. This also should take into account what the students already know about the technology you will provide.
