Climate Council KS3 Enrichment

Club	Staff	Where	When	Who For	More information
Climate Council	BGO	415	Thursday 3.05-3.45pm	KS3	The Climate Council was founded by students who were keen to make changes to some of the school's practices in order to help CCF become an official Ecoschool. members of the club use this time to come up with projects to reduce our carbon footprint and increase our sustainability as individuals but also as a community. We work with members of the 6th form, governors and local council to create meaningful and long-lasting change such as introducing recycling bins, producing metal water bottles and plans to create a nature garden. All of the projects are imagined, planned and executed by the students with the support of staff when needed. This council will help students to better understand our relationship with the environment and how we can protect our Earth. By exploring these big ideas in a supportive group, students can grow in confidence and develop excellent skills to use when they start applying for jobs (project management, budgeting and presentation skills to name a few).
