

Notes for the future from May 11/11/20

- Contact Suzanne Morrison, the Recology rep. for LAHS if you have questions about the composting and disposal system
- Consider naming it "Zero Food waste Group!"
 - From Sybil: "Zero Food Waste means that any leftover food gets made into compost through the LAHS waste removal system. Recology, the company that brings the contents to a Commercial Compost Facility in San Jose."

Brainstorming

- One booth in the gym
- Incentives:
 - Cookies
 - Candy
 - Stickers
 - Unique sticker for Holiday Fair + previous ones
- Disposing:
 - Drinks → hard to recycle
 - We could wash and dry plastic?
 - Only clear plastic is usually recycled
- Selling
 - We could sell reusable drink containers with glass straws
 - Ask all clubs who are selling drinks to give discount or free refill (incentive) if people use our containers
 - Give \$1 from each container we sell to each club that uses it?
- Obstacles:
 - Hot drinks → glass jars = might break?
 - Could use paper cups of our choosing and then compost it

Plan for 2021:

- Goal: To encourage composting and responsible waste disposal at the Holiday Fair
- One booth in the gym
 - Compost and "other" bins
- Incentives:
 - Stickers
 - candy/cookies
- Recycling:
 - Wait to get more volunteers next year
- Selling:
 - Trying to implement next year
 - As soon as form is sent out
 - Publicize on IG
 - Publicize through student news
 - Reach out and meet

- To Do (next year):
 - Come up to measure impact
 - Poll on instagram (not everyone has instagram)
 - Weigh (really difficult to do)
 - Count people who come and compost (could ratio with whole student body, then compare year to year)
 - Could create custom sticker
 - Coordinate reusable reusable drink containers and outreach
