

That, in the opinion of this House, the government should recognize that

- (a) Nuclear energy accounts for roughly 17% of the nation's energy output;
- (b) Nuclear technology is largely outdated, unfunded, and under researched;
- (c) There are theoretical means to make nuclear energy safer and more efficient; and
- (d) A similar motion was passed six (6) months ago, which the Government at the time failed to act upon.

By

- (a) Providing additional funding to research groups involved in studying various ways to improve nuclear energy, such as Thorium energy;
- (b) Considering, after the aforementioned research begins to return results, supplying additional funding towards the modification or renovation of nuclear energy facilities, making them safer and more efficient; and
- (c) Submitting a report authored by the Minister of Innovation, Science, and Economic Development to the House of Commons on how the Government is supporting research into nuclear energy and policies the Government plans on implementing after reviewing the results of said research.
