Privacy Policy – CV Maker

This Privacy Policy explains how CV Maker ("the app"), published by Digital Confident, handles information. This policy is also available inside the app under **Settings → Privacy Policy**.

Summary

CV Maker works entirely on your device. It does not have internet permission, an account system, advertisements, or analytics. We do not collect, store, sell, or share your personal data.

Information You Enter

The resumes, cover letters, photos, and signatures you create are stored only in CV Maker's private storage on your device. The app never sends this information to us or to anyone else.

Photos and Files

When you add a photo, you select it using the Android photo picker. CV Maker only receives the image you select.

Exported files leave the app only when you choose to Share, Save, Open, or Print them, and only through the destination you select.

Backups

If Android backup is enabled, your CV Maker data may be included in your device's encrypted backup, which Google manages according to your account settings.

You can also create a backup file manually from Settings. That file remains wherever you choose to save it.

Permissions

Biometric (optional): Used only for App Lock. Your fingerprint or face data never leaves your device's secure hardware and is never accessible to CV Maker.

Notifications (optional): Used only for the daily 6:00 PM reminder. Reminder messages are selected on your device based on your own progress. No information is sent anywhere. You can turn off notifications at any time in your phone's settings.

Run at startup: Allows CV Maker to re-enable its daily reminder after your phone restarts. It serves no other purpose.

Network status: Allows CV Maker to detect when your connection becomes available again so it can ask Google Play whether an app update is available. This permission does not give CV Maker internet access or allow it to access information about your connection or browsing activity.

CV Maker does not request access to your location, contacts, camera, microphone, general storage, or the internet.

Ratings and Updates

CV Maker may occasionally ask whether you would like to rate the app and notify you when a new version is available.

Both features use the official Google Play in-app review and in-app update features, which operate through the Google Play Store app on your device. Google Play handles the required network communication and manages your rating, review, or update according to Google's Privacy Policy.

CV Maker never receives your rating, review, or any personal data from these features.

Children

CV Maker is intended for adults and older students preparing job applications. It is not directed at children under the age of 13.

Deleting Your Data

You can delete your data in the following ways:

- **Delete individual resumes:** Delete resumes from My Resumes. Deleted resumes remain in Recently Deleted for 7 days.
- **Delete all data:** Use Settings → Delete All Data to erase your data from the app.
- **Uninstall the app:** Uninstall CV Maker to remove its app data from your device.

Please note that data included in Android backups or backup files you created manually may remain available until those backups are deleted separately.

Changes to This Privacy Policy

If this Privacy Policy changes, the updated version will be published here and in the app, along with a revised last-updated date.
