

Name: Robo Cat

Class: DPS

Abilities

Primary Fire: Laser eyes- Jetpack Cat fires lasers beams from its eyes. The beams have a range of 15 meters and do 80 damage per second with a clip of 100 and it uses 15 rounds in 1 second.

Secondary fire/ Ability 1: Grinding blade- Jetpack Cat throws a circular saw blade at high speed. If it connects it will do 20 damage per rotation and will rotate 3 times after hitting something before stopping. Cooldown of 5 seconds

Ability 2: Pounce- Jetpack Cat activates his boosters and pounces forward and up. About 15 meters vertically and if you land on an enemy you do 45 damage. Cooldown of 8 seconds

Ability 3: Sharpen- Jetpack Cat sharpens his claws and increases his damage by 10%. Lasts 6 seconds and has a cooldown of 10 seconds.

Ultimate: Cat's Fury- Target and lock on to enemies. If they are close together the more you can target. Then Jetpack Cat jumps forward and deals 150 damage to each locked on enemy. Targeting period is 5 seconds.

Biography

Race: Omnic

Age: 24

Affiliation: Talon

Base of Ops: Venice, Italy

Lore: This robotic model of a cat was a member of a strain of animalistic omnics that basically mimic household pets. They were created so families that really wanted that kind of pet but have a member that is extremely allergic can still have it. One particular model ran away from its family (like cats sometimes do). The family only became worried when it didn't return later that day and began to look for it. Unfortunately for them someone else in a black hood found it first. The cat was taken to Talon and redesigned and slightly reprogrammed into a stealth operative.

Design: Jetpack Cat looks like a robotic cat only slightly larger. It has red eyes, long claws, and the blades are on the shoulders. It is colored black and metallic dark grey. Has built in jets on feet and a small jetpack on back to give it a boost

Personality: Jetpack Cat is very serious when on a mission but when they are done they are quite playful. It is also quite curious by nature so it will often wander around and try to figure out its surroundings and learn something new from them. All in all it is just like a cat.
