Oral Hygiene Day

1st August 2016

Oral hygiene day is celebrated all across India on August 1st to mark the birthday of the late Dr GB Shankwalkar, the doyen of Indian Periodontics. As a part of Institutional social responsibility, Department of public health dentistry, Saveetha dental college took the opportunity to spread awareness and also to stress the importance in preventing oral as well as periodontal diseases.

Oral hygiene plays a vital role in preventing many oral diseases. Due to lack of awareness clubbed with the illiteracy and poverty, India suffers lot of disparities in terms of oral health care and 95% of the Indian population suffers from periodontal disease and only 50% use a toothbrush, and just 2% visit the dentist.

Hence it is the responsibility of every dental institutions and dentist to address the issue of oral hygiene. It is a global tragedy that diseases are allowed to be caused by improper oral hygiene maintenance. The day is meant to highlight the risk associated with Poor oral hygiene.

Oral hygiene day was celebrated in a meaningful manner by delivering Health education and counselling session with the help of charts, models to create the awareness regarding ill effects of poor oral hygiene and its impact on general and oral health.

Health education pamphlets and tooth pastes were also distributed to all the patients reported to Department of Public Health Dentistry at Saveetha dental college.

Saveetha Institute of Medical And Technical Sciences

Camps Report 2016 - 2021

This event has marked another milestone in Saveetha's history without any doubt. Team effort and holistic approach is essential for any team event. All the staffs and students extended their valuable contribution and support towards the success of this event.

Celebration of National tooth Brushing day:

Oral health is essential to general health and quality of life. Of all the preventive practices, tooth-brushing has been the most effective and simple way to prevent dental caries as well as periodontal disease. Hence November 7th is observed as National Tooth brushing day in India to reinforce the importance of children's oral health and promote good tooth-brushing habits recommended by dental health professionals.

As part of celebration, Department of Public Health Dentistry, Saveetha Dental College has organized a School tooth brushing demonstration in Milton primary School, Saligramam and Schram academy, Maduravayol.

As a part of social responsibility, Youth Red cross- Saveetha dental college distributed free samples of tooth pastes and tooth brushes to rural school children at Mahatma Gandhi high

WORLD HAND HYGIENE DAY May 5

According to WHO, every year, hundreds of millions of patients are affected by health care –associated infections. More than half of these infections could be prevented by caregivers properly cleaning their hands at key moments in patient care. Washing hands properly is one of the most important things one can do to prevent and control the spread of illnesses. World hand hygiene day takes place on May 5. The day is declared by WHO and encourages patients and their family members to join health workers in their efforts to practice good hand hygiene.

On this day, Department of Public Health Dentistry, Saveetha Dental College has organized an awareness program about hand hygiene among public. Pamphlets explaining the method of proper hand washing were distributed to people.

Saveetha Institute of Medical And Technical Sciences

Camps Report 2016 - 2021

WORLD NO TOBACCO DAY

31st May 2017

As a part of Institutional social responsibility, Department of public health dentistry, Saveetha dental college organized “Anti-Tobacco Awareness campaign” on 31st May 2017 on the occasion of “World No Tobacco Day”.

Global Adult Tobacco Survey (GATS), Ministry of health and family welfare, India reported that tobacco use is a major cause of Premature death and disease worldwide. Nearly one million people die in India every year due to tobacco consumption. GATS India highlights current tobacco smokers are 14% of adults; 24.3% of males and 2.9% of females. Current users of smokeless tobacco are 25.9% of adults; 32.9% of males and 18.4% of females. 50% of school going children in the age group of 12years were addicted to the habit of smoking.

It is a global tragedy that diseases are allowed to be caused by tobacco consumption. The day is meant to highlight the risk associated with tobacco usage and reduce its consumption.

Event Description:

The event primarily focused on encouraging users to refrain from tobacco consumption and its related products. The Anti-Tobacco Day is intended to draw global attention to the prevalence of tobacco use and its negative health effects. The ultimate goal is to contribute to protect present and future generations not only from these devastating health consequences, but also against the social, environmental and economic scourges of tobacco use and exposure to tobacco smoke.

This event has marked another milestone in Saveetha’s history without any doubt. Team effort and holistic approach is essential for any team event.

Everyone in the institution extended their support by participating in the silent revolution . This is marked by the badges (with no tobacco slogans) worn on each one’s shirt.

A rally was conducted in kuthambakkam village to create anti-tobacco awareness on 31st May 2017. It included event such as distribution of Information and awareness pamphlets to village people and posters were carried by interns.

Department of public health dentistry, Saveetha dental college organised a camp at KH Exports to promote tobacco awareness on world no tobacco day to employees of KH Exports.

Saveetha Institute of Medical And Technical Sciences

Camps Report 2016 - 2021

Guest lecture on harmful effects of smoking and smokeless form of tobacco and he provided information on second hand and third hand smoking. Health education video on effective measures to stop smoking habit was done as a power point presentation to KH Export employees.
