Operations Meeting February 26, 2021

Attendees: Jeff D, Derek, Jeff P, John, Diego, Huijun, Janet

Apologies:

Fires

-

Announcements

- Diego is up on Freshdesk triage next week, Aaron is up the following week (starting Tue 9th)
- Diego out the Fri 12th
- Aaron is out all next week
- Next week Ops meeting canceled due to AHM
- **Reminder:** please move OPS Jira tx to “In Progress” if you have started working on them, and go through and move tx to “Done” if they are complete:
 - <https://opensciencegrid.atlassian.net/secure/RapidBoard.jspa?rapidView=29&projectKey=OPS>

Nebraska (Derek, Marian, John, Huijun, Eric)

- **GRACC**
 - Wisconsin noticed that GRACC was missing usage. Through debugging, we found that GRACC was not correctly counting GPU usage separate from non-gpu. If a GPU usage record which looked very similar (same DN, same CE, same... ~8 other attributes), that GPU record would overwrite the non-gpu record. Since Wisconsin only had 1 GPU, the gpu usage was very small, and therefore eliminated a lot of usage from Wisconsin. Fixed by updating the logstash configuration on gracc. We summarized all of 2020 to now and removed the old usage (to avoid duplicates).
- **OASIS**
 -
- **OSG Status Page** (<https://status.opensciencegrid.org/>)
 - Contact sync is on [github](#) and [dockerhub](#). Next step, cron job on Kubernetes.
- **Check_MK - Alerting**
 - Hosted-ces cleaned up

Madison (Brian Lin, Jeff Peterson)

-

Hosted CEs

- Updating LE certs on several, most on river had certs expire
- TCNJ (hit by LE ban) Hosted-ce30 moved to tiger and renamed tcnj-elsa-ce1.svc.opensciencegrid.org - working now so I need to update topology
- UWM-NEMO also looks to be hit by LE ban.
- Still a few more to poke at that aren't showing up in collector, will be doing that this afternoon
- Lamar Singularity adjustment made, but waiting on more Clas12 jobs to trigger more pilots
- Working with new site UTC to prepare for Hosted CE
- AMNH having singularity issues, but only on one cluster, Mats says there is a fix in git but wary of more hotfixes to production
- Meeting with Marco (and maybe JeffD) on Monday before All-Hands to go over Stampede allocation setup

Chicago (Pascal)

-

Michigan (Shawn)

-

UCSD (Jeff, Edgar, Diego)

Caches:

- ESnet cache broke after update to rc-7 because of duplicated monitoring config lines
- One of the SoCal cache servers got stuck with most of its disks at 100% a restart fixed it.

Frontends

- NTR

Central Manager

- NTR

GWMS Factory

- Debugging nordugrid CE issues, a change required to work with GDPR constraints broke the condor-g client. Jaime Frey gave us a new one to try, it works
 - Had troubles upgrading factory to condor 8.8.12, it broke the OSG frontend submission so we rolled back to 8.8.10, need to debug before applying the nordugrid fix
