Comments on the Recent Events

To the People of Fremont, Greeting:

SACRAMENTO, CALIFORNIA— I am both upset and saddened by the events that occurred today in San Francisco. The attack today is nothing but a cowardly attack by the radical left who believe they are above the law, but there this, citizens of the great state of Fremont. They will know justice, and anyone else who thinks that political violence is acceptable and believes they are above the law, we will find you, and you will know what true justice is.

It is now our moral and civic responsibility to ensure that something like this never happens again; I call on the legislature to put forward a bill that increases the funding and security for all state elected officials. While the Governor and I have had disagreements both in the past and to this very day, I wish nothing but a speedy recovery for the Governor. My thoughts and prayers are with him today, and I ask that all citizens keep him in your prayers today. In the meantime, my office and I are prepared to step up while the Governor recovers from this horrific attack to ensure peace, stability, and security throughout this dark day in Fremont history.
