

2025 Savannah Regional Qualifier Winners

Elementary School Division Placement Winners

Award	Invention	School	Teacher	Inventor(s)
1st Place	Tech Can	Heard Elementary	Gloria Sapp	Mia Balram, Nina Negron
Description: Tech Can has a motion sensor that senses what you put inside to see if it can be recycled.				
2nd Place	Eraser 2.0	Heard Elementary	Gloria Sapp	Makail Henley, Zarria Bacon, Lydia Dobson
Description: This dual purpose eraser also doubles as a tool that keeps your pencil from rolling off of the table!				
3rd Place	Retract Eraser	Heard Elementary	Gloria Sapp	John Bynum, Justin Fennell,
Description: This handy tool attaches to your pencil so you don't have to worry about running out of an eraser!				

Middle School Division Placement Awards

Award	Invention	School	Teacher	Inventor(s)
1st Place	Fats O Fighters Lunch Locks	Esther F. Garrison School of the Arts	Laura Ike	Zoe Karr, Isabella Edenfield, Olive Bartlett
Description: Our invention is a lock for your lunch box that keeps you from overeating. It has a timed lock so that you can only eat at certain times. If you want to open it at a different time you use the number we have provided to call us. We will give you a code to open. So that you can't eat other times when you use the code it makes a loud noise.				
2nd Place	Pyra Sleep System	Esther F. Garrison School of the Arts	Laura Ike	Annabelle Lee
Description: The Pyra Sleep System is an AI based system that you can connect to all of the devices in your room, and using information from a sleep study (or				

personally uploaded data), creates the perfect environment for sleeping. By controlling light, sound, humidity and temperature, you will never stress about your sleep again.

High School Division Placement Awards

Award	Invention	School	Teacher	Inventor(s)
1st Place	MagKnight	Effingham College and Career Academy	Aaron Parker	Madeline Folland
	Description: The MagKnight detects harmful magnetic fields for pacemakers and defibrillators.			
2nd Place	SafetySearch	Richmond Hill High School	Stephen Peterson	Brieanna Pertuz, Shivam Shah, Viviana Pritchett
	Description: The idea of Safety Search originated from the uncertainty of visiting unfamiliar places, and having concerns about crime risk. Our idea began as a portable translator that would detect possible dangers but we quickly changed the concept and brainstormed an extension of google maps in order to better suit a demographic of users. Safety Search would create color coded danger areas coordinated with specific crimes that affect travelers such as pickpocketing, assault, etc... The extension is planned to be a layer that may be applied over the existing google maps and gathers information from law enforcement agencies, ATF, and in extreme cases the FBI.			
3rd Place	Healthy Heat	Richmond Hill High School	Stephen Peterson	Karson Phillips, Hollis Wehner,
	Description: Are you tired of dealing with wrist pain that hinders your daily activities? Look no further! Our Wrist Brace is designed to provide targeted support and relief, allowing you to regain your strength and confidence. Whether you're an athlete or simply looking for comfort during everyday tasks, this innovative brace offers a perfect blend of functionality and comfort.
