- Mitamas can be used to transfer skills that couldn't be on demons through normal fusion
    - Ex.

- Nemissa cannot normally learn Meat Bullet or any other Phys due to Dominion, and Titania having weaknesses to Phys for the Special Fusion. I fused a Saki Mitama (as a test) and was able to fuse Nemissa and Saki Mitama in order for me to get Meat Bullet put on her.
- You can pre-set your Mitamas to help you with quick building for either casual or speedrunning purposes.
- You CAN'T transfer demon exclusive skills
