

# The Curtis'

## Mr. and Mrs. Curtis

- Inventors
- Mrs. Curtis had cervical cancer when she was younger and had to get a hysterectomy
- They created Darry so they could have a child
- Sodapop was the orphan son of Mrs. Curtis' sister
- Ponyboy was an orphan they found on the side of the road
- Died in the fire in the shop

## Darry

- Robot
- Was created because Mrs. Curtis couldn't have children
- Can cry oil tears
- Synthetic skin that's very realistic, but can tear
- The skin on his face is stronger and can't tear
- When he gets embarrassed his system heats up causing him to blush
- Can eat, doesn't like to though. It just kind of sits in his stomach cavity and rots away
- Can't get his head wet, it holds his memory chip and motherboard
- The Curtis parents made a new body for him every year when they were alive
- Remembers everything that's ever happened to him because it's the same memory chip and motherboard in each body

## Sodapop

- Cyborg
- The only Curtis kid actually related to either of their parents
- His mother was Mrs. Curtis' sister who died shortly after giving birth to him
- His dad was a deadbeat
- Had severe heart problems that Mr. and Mrs. Curtis fixed with a bionic heart
- He faints easily because of this
- He has a robot leg too
- He wonders what his birth mother was like sometimes
- Still a dropout
- Works at the DX full time

## Ponyboy

- Cyborg
- Mr. and Mrs. Curtis found him on the side of the road bundled up in blankets
- That's why he doesn't look like either of his parents
- Has two robot legs
- The legs make him able to run faster than a human
- Top speed so far is 74 mph running
- Does deliveries for Darry sometimes
- Feels like the odd man out occasionally then remembers Darry's a literal robot and feels better
- On the track team for cyborgs and robots

## The Shop

- Attached to the Curtis' house
- Basically a garage turned robot shop
- Burned down in an accident
- Darry managed to fix it though and now works out of it
- Has pick-up or delivery
- Darry can either make new parts for a robot/cyborg or fix their own part
- Usually arms
- The occasional leg

## The Mathews

### Facts

- Mrs. Mathews, Two-Bit, and Brenda were all part of a cryogenic experiment
- They were all frozen and basically left for 50 years
- When they were all woken up they were given a house and a PowerPoint on what had happened while they were asleep
- They met the Curtis' and that was that

### Mrs. Mathews

- Human
- Works at a bar
- She deserves a raise and a nap

## Two-Bit

- Had the hardest time adjusting to robots
- Didn't get along well with Darry at first
- Still has trouble figuring out what is and is not rude when it comes to robots
- Still a little shit
- When he woke up he was physically and mentally still 14
- Technically he's now 68
- Uses that in arguments too much even if he's still mentally 18

## Brenda

- Was physically 9 when she woke up
- Is now technically 63
- Also uses that fact in arguments too much since she's mentally 13
- Adjusted a lot faster to robots than Two-Bit did

## The Shepards

### Tim

- Cyborg
- His arm got really hurt in a car accident and had to get a robot one to replace it
- He only lets Darry fix his arm when it gets fucked
- The scar gets sore if he wears his arm too much so he has to take it off and let it be for a while each day

### Angela

- Human
- Loves to hang out by the various noodle bars on the poor side of town
- She's trying to convince Tim to let Darry teach her how to fix robot parts
- Threatens to turn Curly into a robot nearly every day

### Curly

- Human
- Says he's a cyborg to impress girls
- When they ask what part of him is fake he says they'll just have to guess
- He's only gotten smacked for it, but he's sure it'll work eventually
