Aside from the cryptocurrency, **TrustDice also supports fiat currencies**, including EUR, JPY, and KRW. Now, that is an excellent payment system.

In addition, it also features built-in integration that allows players to deposit all alternative cryptocurrencies, which convert into supported currencies.

TrustDice also features TXT, a proprietary coin that players can use on the right platforms. Traditional cryptocurrency exchanges also support this coin.

Players may use a Visa/Mastercard card to make a deposit. Additionally, cryptocurrencies (BTC/ETH/USDT) and e-wallets (MoonPay/Apple Pay/Sticpay) are also available. Depositing money to the player's account is free of charge.

TrustDice also supports Single Euro Payments Area (SEPA) currency for deposits.

There is a minimum deposit requirement for the players, at least 0.001 BTC, 0.05 ETH, 10 USDT, 10 EUR, or 1,000 JPY. This minimal deposit would already allow the player to enjoy the welcome bonus.

Withdrawals & Payouts

TrustDice boasts an excellent cash out process for its players. Players have three payout methods to choose from, including Visa or Mastercard credit cards, BTC, ETH, and USDT cryptocurrencies, MoonPay and Sticpay e-wallets.

Like other gaming platforms, minimum and maximum withdrawal also apply.

The minimum withdrawal requirements on TrustDice are 0.001 BTC / 0.01 ETH / 3 USDT. A verification procedure is necessary for higher withdrawals or amounts that exceed 1 BTC or EUR 2,000. These minimum withdrawals are low, making it easier for the player to cash out even small wins.

The maximum withdrawal a player can make will depend on the game played.

Dice Single Bet: 500,000 JPY / 5,000 EUR / 1 BTC / 30 ETH / 2,000 EOS / 5,000 USDT / 2,000,000 TXT

Crash Single Bet: 200,000 JPY / 2,000 EUR / 1 BTC / 20 ETH / 2,000 EOS / 2,000 USDT / 2,000,000 TXT

Casino or Live Casino Bet: 500,000 JPY / 5,000 EUR / 1 BTC / 30 ETH / 5,000 USDT

Players Support

TrustDice only has email (info@trustdice.win) and chat support channels, which is a bit disappointing for some players who love to pick up their phones to get help. Nevertheless, it still allows you to communicate possible issues that you will encounter.

The most efficient is chat support because **chat representatives respond in almost real-time**. Well, it also depends on the number of players needing help at the same time. Agents answering the queries are pretty knowledgeable, and you can talk to them with ease.

TrustDice also extends support through forums and communities using other platforms like Discord and Bitcointalk.
