Bullying in Schools

<https://www.stopbullying.gov/media/facts/index.html>

Us department of health and human services.

What I gained from this was the different types of bullying, the different types of how to stop it as well. I also learned statistics and how many people actually get bullied. I also have seen that this site says that bullying isn't always the stereotypical beat someone up but can be destroying their property and also psychologically harming them.

1. Quote: The current definition acknowledges two modes and four types by which youth can be bullied or can bully others. The two modes of bullying include **direct** (e.g., bullying that occurs in the presence of a targeted youth) and **indirect** (e.g., bullying not directly communicated to a targeted youth such as spreading rumors). In addition to these two modes, the four types of bullying include broad categories of **physical, verbal, relational** (e.g., efforts to harm the reputation or relationships of the targeted youth), and **damage to property**.

Annotation: The 2 bullying types are direct bullying that targets someone and one that isn't exactly targeting someone but more like spreading rumors which is indirect. Also there is verbal, physical and relational. There also seems to have a connection but all have a big difference that truly separates them.

1. Quote: Electronic bullying or [cyberbullying](#) involves primarily verbal aggression (e.g., threatening or harassing electronic communications) and relational aggression (e.g., spreading rumors electronically). Electronic bullying or cyberbullying can also involve property damage resulting from electronic attacks that lead to the modification, dissemination, damage, or destruction of a youth's privately stored electronic information.

Annotation: Electronic bullying is direct bullying but usually using phones and computers to bully others over social media. This form of bullying can really affect someone as it can be harder to get away from it.
