

Team member names: _____

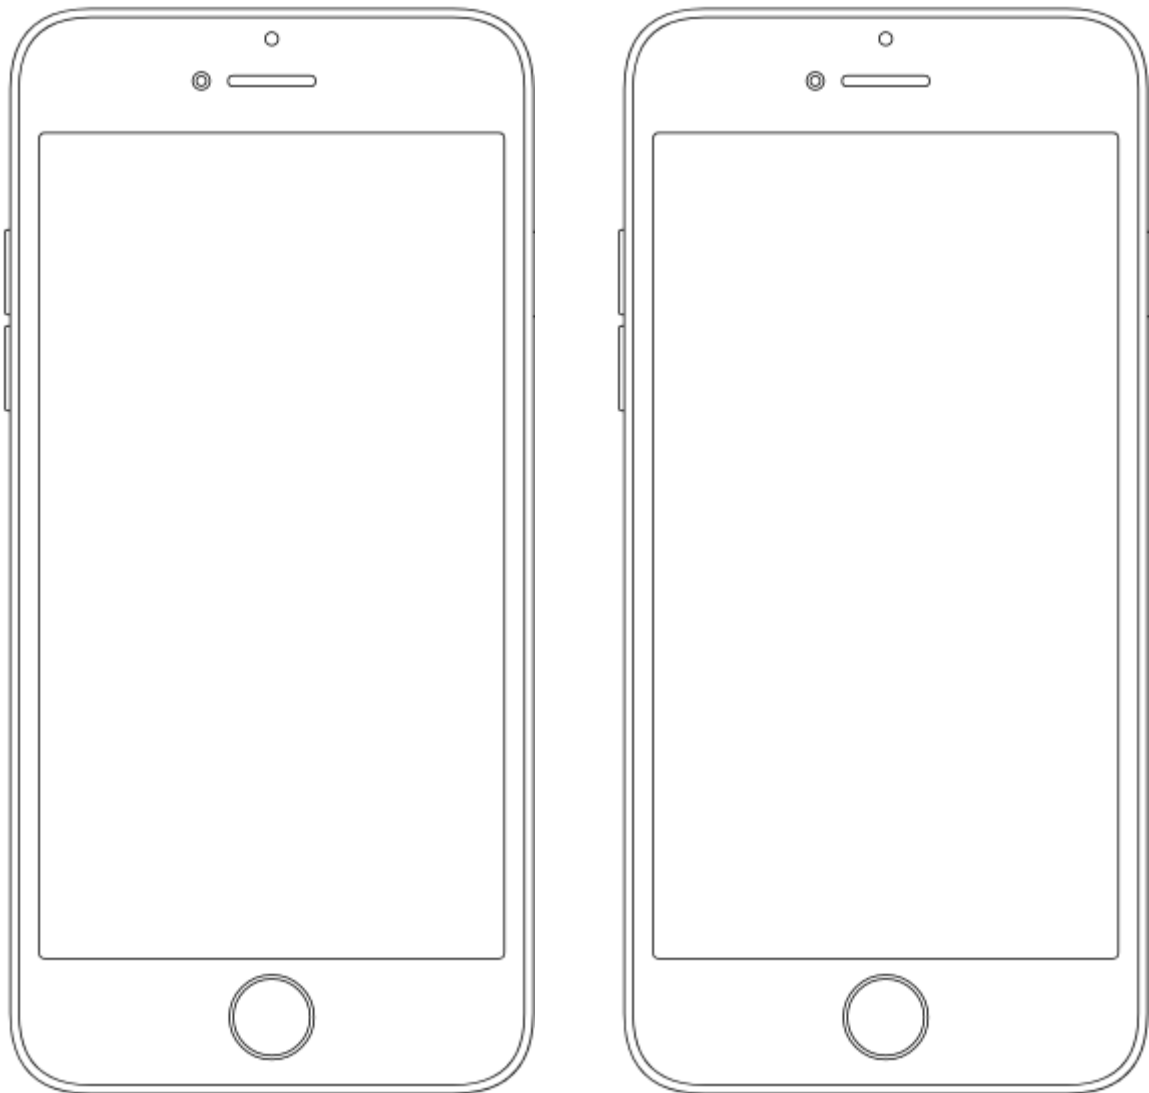

What is your app called: _____

What is its tagline/slogan:

What are the most compelling features and benefits of your app?

What imagery will make it stand out?

Mock up main page and page with learning objective: order of operations

Write out pseudocode or flowchart for solving order of operations math problems. Programmers can use this algorithm to check students' work. Be sure to write out your initial pseudocode or flowchart on scratch paper and test before writing your final version below.
