

Please contact Professor David Herrera (dherrera@sfsu.edu) if you are interested in one of these opportunities. Must be a Graduate Student to be considered.

RA Position #1: Environmental Justice Collaborative Process Project

The RA will support a current research project that explores the role of collaboration in decision-making and addressing environmental justice. The RA will be involved in conducting literature reviews, evaluating books, journal articles, and other sources. The RA will be responsible for creating, managing, and updating the resources collected for this project in an online storage system and reporting updates on the project. The RA will receive guidance and support during the course of the project. The position is open to all SotE graduate students. Pay rate \$24.00 per hour.

RA Position #2: Environmental Justice and Network Analysis Project

The RA will support a current research project that examines the network structure of California-based environmental justice coalitions. The RA will be involved in data collection, evaluating websites of nonprofit organizations in the environmental justice space and collecting data based on key parameters developed by the research team. The RA will be responsible for creating, managing, and updating the data set for this project in an online storage system and reporting updates on the project. ArcGIS and other GIS tools will be used for this project. The RA will receive guidance and support during the course of the project. The position is open to all SotE graduate students, but strong preference will be given to students with basic proficiency in GIS Mapping. Pay rate \$24.00 per hour.
