

FORMATIVE Assessment MISSION

Use this HyperDoc to explore and learn more about formative assessment. Follow the lesson design notes, content, links, and instructions.

Today I will refine my understanding of formative assessments by exploring choices I may have not yet considered.

So that I can better monitor what and how my students are learning in order to become more responsive and make better instructional decisions.

I'll know I'm successful when I have a plan to use one new formative assessment strategy with my students.
