

Our film bears out of some of Wolfe's witty (and sad) observations about public attitudes after the Apollo 11 landing.

We'll review this scene from the mission, just before the accident, when the networks drop coverage of the in-flight broadcast (0:45:30). We'll also look at what happens when Marilyn Lovell says when she tells NASA PR man Henry that she wants the press off her lawn (starts after 1:21:00).

- Your teams will take 15 minutes to write a response about ONE OTHER big message this film presents. Aim for a couple of paragraphs with examples from the film (make them specific but do not worry about time codes for now).
- We'll share these.
