

BEAUTIFUL CREATURES

ANIMATION RULES

1. Absolutely no NSFW/suggestive content.
2. Gore is not allowed. Slight blood is okay if necessary but it doesn't really fit the theme of this MAP!
3. Art theft will not be tolerated. This includes but is not limited to tracing, AI "art", and outright reusing/reuploading art you do not own.
4. Maximum of ONE PART per person! As there are only 14 parts in this map, we do want to give other people a shot at claiming parts!
5. For this map, you will be animating YOUR original species and YOUR original species only! Species can be anthro, feral, or humanoid. You may get permission to animate a friend's species, but they will need to join the server briefly to give me verbal confirmation that they okayed it. They are welcome to leave afterwards if they do not wish to stay ^^
6. This should be obvious, but you may not animate species from popular media that you do not own, for example, a night fury from How To Train Your Dragon. You also may not animate a straight up real life animal, such as a domestic cat, as you did not create the real life animal.
7. You may not use any widespread/popular original species, such as a protogen. I want to see *your* originality! With this in mind, things like Wings of Fire fan tribes are also not permitted. While they are original creations, for this MAP they will fall under the fandom umbrella as those species are created with a fandom in mind.
8. Original species can look similar to real life animals/humans but should not look exactly the same. For example, an elf species whose only physical separation from humans is that they have pointy ears is not allowed.
9. If you have any confusion or questions about which species are allowed, please ask and I'm happy to help!
10. Parts are not first come first serve. While this map is semi beginner-friendly, you need to know how to animate and have

examples of your animations. Parts will be chosen approximately 24 hours after the map opens.

11. With the above in mind, this map requires lots of movement and effort put into parts. Parts should be animated either frame-by-frame or using lively tweening (depending on your preference), so make sure you know how to do one or both of those things. STILL FRAME PMV IS NOT ALLOWED!
12. Please do not put lyrics or words in your part!
13. Try your best to showcase your world's species, culture, and worldbuilding! We wanna see it all! I just love OCs so much gah
14. For the code, tell me a bit about your original species! (DM it so that others cannot copy the code!)
15. All parts must have a proper scenery background, so things like flat colors, patterns, gradients, google images, etc. are not permitted.
16. Discord is required to join this map, [here is the server link](#). (If we're friends/mutuals, we can 100% communicate through DMs instead!)
17. Please do not guilt trip others or beg me for a part if you do not get one.
18. This rule goes for the whole server in general but please treat others with respect. Intentionally disrespecting others for any reason will not be tolerated no matter what.
19. You have one month to complete your part and you can be given extensions if they are needed!
20. If you currently have any unfinished parts in one of my other MAPs, you may not join until those parts are finished!
21. Please provide me with a video or download link when your part is complete, and DO NOT add cut-ins or cut-outs. Please do not send me something like a YouTube link where I will have to screen record it. You can send a YouTube link only if you provide me with a direct download as well.
22. I am happy to give audio cuts if needed!
23. Have fun and get creative :3

THUMBNAIL RULES

1. You can make as many entries as you'd like!

2. Absolutely no NSFW/suggestive content.
3. Gore is not allowed. Slight blood is okay if necessary but it doesn't really fit the theme of this MAP!
4. Art theft will not be tolerated. This includes but is not limited to tracing, AI "art", and outright reusing/reuploading art you do not own.
5. For this map, you will be drawing YOUR original species and YOUR original species only! Species can be anthro, feral, or humanoid. You may get permission to draw a friend's species, but they will need to join the server briefly to give me verbal confirmation that they okayed it. They are welcome to leave afterwards if they do not wish to stay ^^
6. This should be obvious, but you may not draw species from popular media that you do not own, for example, a night fury from How To Train Your Dragon. You also may not draw a straight up real life animal, such as a domestic cat, as you did not create the real life animal.
7. You may not use any widespread/popular original species, such as a protogen. I want to see your originality! With this in mind, things like Wings of Fire fan tribes are also not permitted. While they are original creations, for this MAP they will fall under the fandom umbrella as those species are created with a fandom in mind.
8. Original species can look similar to real life animals/humans but should not look exactly the same. For example, an elf species whose only physical separation from humans is that they have pointy ears is not allowed.
9. If you have any confusion or questions about which species are allowed, please ask and I'm happy to help!
10. Please provide me with a version WITH text and a version WITHOUT text!
11. No deadline! Just make sure you get it done before the map is completed. If I am able to estimate a deadline, I will edit this doc and add it.
