

Draft email

We are delight to announce the publication of

Making content usable for people with cognitive and learning disabilities at <https://www.w3.org/TR/coga-usable/A> as a W3C note and supplement to WCAG.

This document is for people who make web content, including web applications. It focuses on meeting the needs of people with cognitive and learning disabilities. It covers:

- aims and objectives for usable content
- design patterns (ways) to make content usable
- including users in research, design, and testing activities
- personas and user needs

It is published by The Cognitive and Learning Disabilities Accessibility Task Force, Accessibility Guidelines Working Group, and Accessible Platform Architectures Working Group and is currently a wide review working draft.

If you have comments, please [file an issue in the W3C coga GitHub repository](#) or send email to public-cognitive-a11y-tf@w3.org by the 4th September 2020.

List

Have you sent it out for comments?

Please let us know who to bellow:

- WCAG/AG wai interest group sent by Shawn official post
- Easyreading consortium will be sent by Lisa
- G34ict (lisa)
- Clayton lewis (lisa)
- assistID tech (lisa)
- UN (lisa)
- Ministry of justis - israel
- Israel AT inovation group (lisa)
