

LIST

THE DEFINITIVE OLD ROBLOX REVIVALS LIST

Owned by: **VandGD**

[Discord Server](#) | [Website](#)

^Suggest new revivals here^

NOTICE

NO! As long as the developers don't profit off of it, old Roblox revivals are **NOT ILLEGAL!**
Using Roblox's (mostly unlicensed) assets as a part of an online private server should not qualify as unlawful use of copyrighted content! If the developers do profit off of these private servers, it's mostly to keep their websites running, and to provide better and more accurate services for these private servers!

LEGEND

Public = No invite keys required

Private = Invite keys/referral required to join

Work In Progress = Unfinished, needs polishing, not yet available to the public

Launcher = A separate application that comes with multiple clients and maps

Simulator = A revival game inside of Roblox (ex: RetroStudio)

Dead = No longer operating

Don't = Not recommended to join

2004 up to 2022 = The time period(s) said revivals are trying to bring back

- Please note that there can be any additional clients between two mentioned years (ex: 2014 - 2017 probably also has 2015 in it)

No client = Does not have any clients/versions of Roblox yet

- Any external description is for providing extra context. ORB is a joke revival, Throwback engine was a social experiment, etc.

(?) = Not sure, needs external confirmation

THE LIST

PUBLIC:

Luigiblox (<https://discord.gg/Za9VqVC4A5> Public) 2008

Nostro (<https://robloxa.cf> Public) 2009

RULES

RULES

Revival, Revival(s), refers to external private servers that utilize old Roblox clients, outside of the Roblox platform itself.

As far as our team is aware, none of the revivals and external private servers listed on the Old Roblox Revivals List are affiliated nor endorsed by Roblox Corporation.

1. Do NOT recommend and/or list revivals that use code written by artificial intelligence!

1,1. This includes (but not limited to) ChatGPT, DeepSeek, Gemini, Microsoft Copilot, Grok, and many more.

2. Do NOT recommend and/or list revivals that utilized visual website builder tools!

2,1. This includes (but not limited to) Google Sites, Canva, Figma, and many more.

2,2. ALL revivals on the list MUST use raw, handwritten code, preferably in the forms of PHP, ASP.NET, Laravel, Symfony, JavaScript, and many more.

3. Do NOT recommend and/or list revivals that host explicit content on its website or in the client!

3,1. This includes (but not limited to) NSFW, cropped NSFW, blatant NSFW references, revenge NSFW, gore, uncensored personal information, and many more.

If content mentioned above is found in one of the revivals listed on our website, we have the right(s) and reason to remove it or move it down to unrecommended categories!

If you'd like to file a complaint, send a message to @vandgd on Discord, or join the Old Roblox Revivals List Discord server.

<https://discord.gg/RqhWsmWatx>
