

Niche Survey Questions

What are the three most important things you need your website to do?

Tell me about your experience with building your current website. Did you DIY or hire it out? What part frustrated you the most? What did you love most about it?

If you could go back and change one thing about your experience, what would it be?

If you could wave a magic wand and fix one thing with your current setup, what would it be?

What do you wish you would have known when you started the whole process?

Where do you hang out online? What's your favorite social network?

What blogs do you read?
