

## Teamwork and Creativity for Children and Youth

<https://www.destinationimagination.org/>

We are hoping to start Destination Imagination teams for kids and teens this fall in Washington Central afterschool programs. This Challenge Experience is a fun way to do STEAM (STEM + Arts) projects and build social-emotional skills through teamwork.

Each group will do lots of creative activities, and collaborate on a project Challenge in one of these genres: Scientific, Technical, Engineering, Fine Arts, Improvisation, or Service Learning. Teams present their Challenge solutions in March at the State Tournament in Barre.

To make this happen for our students, we need adult Team Managers to supervise and facilitate team meetings once or twice a week after school. Vermont DI provides training, resources, and ongoing consultation. Are you interested? Please contact [vtDICreativity@gmail.com](mailto:vtDICreativity@gmail.com)
