The DeFi platform's smart contracts have undergone rigorous [audits](#) by the esteemed security firm SolidProof, ensuring the utmost security when trading these assets.

## Whale Dump Triggers Floki Inu Price Crash

In the past week alone, [FLOKI](#)'s price has dropped over 20%, currently hovering around \$0.000122. The total market value of the Solana Memecoin has also shrunk to \$1.17 billion, positioning it as the sixth-largest meme coin in the market.

SpotOnChain said Floki Inu's price dropped after a previously inactive wallet moved over 15 billion tokens, valued at nearly [\\$2.3 million, to Binance](#).

The tokens were acquired in early 2022 at a price of \$0.0000307. Selling now could yield a profit of over \$1.8 million.

Moreover, the sudden influx of FLOKI tokens into the market due to these potential significant sell-offs is believed to have sparked fear among investors, leading to increased selling activity and exacerbating the challenges faced by bullish traders.

## RCO Finance's (RCOF) Presale: Your Chance to Beat the Market

The recent decline in FLOKI has drawn attention to the RCOF presale as a more promising investment opportunity. Currently priced at **\$0.0344 per token**, new investors can use the promo code **RCOF50** to receive a 50% bonus on their purchase. This limited-time offer significantly reduces investment risk while maximizing potential returns.

Now is the time to secure your presale tokens, as they will soon be listed on exchanges. Projections suggest trading prices between \$0.40 and \$0.60, yielding an impressive potential gain of over 10x. Some projections even suggest that RCOF could surpass FLOKI's year-to-date gains, possibly doubling them.

Investing in RCOF goes beyond the presale phase, offering enticing perks like robust community governance and the opportunity to stake RCOF tokens for passive income. Presale participants also can win up to \$100,000 in a draw.

Don't miss out on this opportunity—dive into RCOF now to unlock its potential for remarkable growth!
