

Here be the spot for **ownership transfers** and **changes in Sindow information**.

To transfer ownership of your Sindow:

You do not have to let admin know why or what the other person bought the Sindow for, just remember, no RL money or dA points. Those deals are between you and the new owner, though it is nice to keep track of it somewhere for personal record, with any other deals you and the new owner make.

New owner must already be a member of [SindowARPG](#) or join it before the transfer will be official!

Just respond to this log: [Ownership Transfer](#)

This is the info you'll need:

Link to Sindows import sheet:

New Owners Username: (please tag them, don't just write it down, so they know you've posted the transfer).

Information Changes:

This is for any personalized information in your Sindows import sheet, meaning: Name, nickname, stable abbreviation, personality, backstory, and discipline. As well as adding a link to your stable or the Sindows handler.

You can add to what's already there, change what's already there, or erase it and start anew. This is the same for anyone who has a just acquired a Sindow with a name/personality already in the import sheet or no information at all. You can add, change, etc...

Just respond to this log: [Information Change](#)

This is the info you'll need:

Link to Sindows Import Sheet:

What you are changing/adding to: (name, personality etc...) please state if you are changing or adding to something etc...

New Info: (so the additions or new information goes here.)

- you will not be able to change stats, lineage, ID, and genetics/type/coat type (unless items are bought and taken through the right way to get them changed).
