

Title of Manuscript in Bahasa (Recommended max. 20 words): The title should accurately, clearly, and concisely reflect the emphasis and content of the paper. The title must be brief and grammatically correct

Title of Manuscript in English (Recommended max. 20 words): The title should accurately, clearly, and concisely reflect the emphasis and content of the paper. The title must be brief and grammatically correct

First Author^{1,*}, Second Author²

¹ Affiliation of the first author and should contain at least the name of the institution, city, and country

² Affiliation of the second author and should contain at least the name of the institution, city, and country

*E-mail: corresponding author's email

DOI: -

Received:, Revised:, Accepted:, Online:

1. Abstrak

The abstract should state briefly the purpose of the research, methodology, main result, and major conclusions. The abstract should not be more than 250 words and should be written both in English and Indonesian (for Indonesian authors only).

Kata kunci: 3-5 words (please arrange alphabetically)

2. Abstract

The abstract should state briefly the purpose of the research, methodology, main result, and major conclusions. The abstract should not be more than 250 words and should be written both in English and Indonesian (for Indonesian authors only).

Keywords: 3-5 words (please arrange alphabetically)

1 Pendahuluan/ Introduction

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results. The manuscript may include sections such as an introduction, methods, results, discussion, and conclusions. It is important that the file be saved in the native format of the word processor used. The text should be in two-column format, except for titles to abstract. Keep the layout of the text as simple as possible. To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor. It is noticed that Tables and Figures are placed at the end of submitted articles. Abbreviations and acronyms, if any, are defined upon first usage.

2 Metode Penelitian/ Method

Provide sufficient material and instrumentation mainly used in the work. Provide details of the research method to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described..

3 Hasil dan Diskusi/ Result and Discussion

Results should be clear and concise. This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

4 Kesimpulan/ Conclusion

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

3. Ucapan Terima Kasih/ Acknowledgement (optional)

Generally, the last paragraph of the paper is the place to acknowledge people, organizations, and financing (you may state grant numbers and sponsors here). List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

4. Daftar Pustaka/ References

Jurnal Kartika Kimia uses Vancouver style for the citation and references. The references used at least 15 references and should be a minimum of 80% journal articles and also a minimum of 80% up-to-date references (maximum of 10 years). Author is recommended to use a reference manager such as Mendeley.
