Thanks so much for your donation to Bridge Foundry! Your donation will be used to amplify the work of volunteer efforts. Our network of bridges includes many technologies: Rails, Javascript, Clojure, iOS, Android, Go, Rust, Elm, Elixir, and Scala. We support additional technologies when someone volunteers to [make a bridge](#).

We are also exploring new initiatives to support our goals:

1. **Transform** tech culture
2. **Generate** leaders, teachers, mentors
3. **Empower** underserved groups

If you know someone who wants to volunteer, please tell them about our [events](#) or [this form](#). If you want to learn more or talk about your ideas for making a difference, please send a note to hello@bridgefoundry.org

We partner with School Factory for our 501c3 operations, see below for information about how to claim a tax deduction in the US.

Your support makes a real difference.

Sarah Allen
Bridge Foundry, Program Director
