ABSTRACT

Open Access

Type: (Systematic Literature
Review/Research Paper)

Article:

Received: xxxx xx, 20xx

Revised: xxxx xx, 20xx

Accepted: xxxx xx, 20xx

Issued: xxxx xx, 20xx

Abstract is a synopsis of the work containing the problems studied, the purpose of research, information and methods used to solve problems, and conclusions. Articles must be submitted in print-ready format and are limited to a minimum of ten (10) pages and a maximum of twelve (12) pages. Abstracts are limited to 200 words and should not contain references, mathematic equations, figures, and tables. The font size for abstracts, keywords, and body of article is 11pt. Keywords are no more than six (6) words, but the minimum is three (3) words.

Keywords: *Web, Asset Management, CodeIgniter, Bootstrap*

1. INTRODUCTION

This guide contains a detailed script template that the author must prepare to be published in Jurnal Teknik Informatika, so it must be uniformed according to the template that has been given. In this template, there are already layout, style, illustration and reference guidelines as well as a writing model that can be imitated by the author. Writing that does not comply with this standard template will not be published by Jurnal Teknik Informatika.

To use this template, please save this Microsoft Word file to your document, then copy and paste your writing here using the "Keep Text Only" option. It should also be noted that the editor of Jurnal Teknik Informatika does not charge fees for processing and publishing in Jurnal Teknik Informatika. Please follow the more detailed instructions in the Author Guide

1.1 Writing Guide of Introduction Chapter

In the introductory chapter, the author should provide adequate background, and a brief literature survey to show differences from previous research, to show what you hope to achieve, and to point out the scientific achievements or novelties of the submitted article manuscript. This section also includes the writing of relevant previous studies. Furthermore, the writer must state the purpose of the research at the end of the introductory chapter.

Please also add at the end of the introduction, a statement that this manuscript is the original result of your research or the development of previous research using your own ideas. Articles that you submit will be thoroughly checked with plagiarism checker software (Turnitin). If the results of the examination are more than **20%**, then we reserve the right to reject articles from the author. **[Font: Times New Roman 11 point, Justify]**

2. METHODS

The method explained in this part is scientific and shall make the readers can repeat the experiment you have conducted. Please follow the guidelines which is more detail in Author Guideline. **[Font: Times New Roman 11 point, Justify]**

3. RESULTS AND DISCUSSION

The experiment result shall be explained clearly and shortly. It is expected that the discussion written in this chapter can be supported by the relevant theories. Please follow the guideline which is more detail in Author Guideline. **[Font: Times New Roman 11 point] [All paragraphs of Justify]**

CONCLUSION

The closing section should be in the form of a paragraph that addresses the research objective, telling how your work can advance current knowledge. After the closing section, the authors are expected to be able to follow the Bibliography writing format provided below, which follows the IEEE format and refers to at least 10 articles in indexed journals or national and international proceedings published in the last 5 years. In addition, the author can also include "Acknowledgments" after the Bibliography section. Please follow the more detailed instructions in the Author Guideline.

Thank you for reading this writing guide to the end. The authors of the articles are expected to send their CV containing the phone number to Open Journal System, in a Supplementary File or sent to our e-mail address, namely jurnal-ti@apps.uinjkt.ac.id. As for article writers who do not send their CV, they will not be published in Jurnal Teknik Informatika. **[Font: Times New Roman 11 points] [All Paragraphs of Justify]**

DECLARATIONS

Authors must provide the relevant declarations below to ensure transparency, accountability, and research integrity. Include Author Contributions, Funding, Conflict of Interest, Generative Artificial Intelligence Use, Ethics Approval and Informed Consent, and Data Availability, as applicable.

Author Contributions: State the contribution of each author to the research and preparation of the manuscript. The use of the CRediT (Contributor Roles Taxonomy) is encouraged, including, where applicable, conceptualization, methodology, investigation, data curation, formal analysis, writing—original draft,

writing—review and editing, visualization, supervision, project administration, and funding acquisition. Example: “Author 1 conceptualized the study, developed the methodology, conducted the formal analysis, and prepared the original draft; Author 2 supervised the research, validated the findings, reviewed and edited the manuscript, and approved the final version.”

Funding: Identify all sources of financial support for the research, including the name of the funding agency and the grant or contract number, where applicable. Indicate whether the funder had any role in the study design, data collection, analysis, interpretation, manuscript preparation, or decision to publish. If the research received no external funding, this must be stated explicitly, e.g., “This research received no external funding.”

Conflict of Interest: Disclose any financial, professional, institutional, personal, or other interests that could reasonably be perceived as influencing the research, interpretation of the findings, or publication of the manuscript. Recommended statement when no conflict exists: “The authors declare no conflict of interest.”

Generative Artificial Intelligence Use Statement: Disclose the use of Generative Artificial Intelligence (Generative AI), Large Language Models (LLMs), or other AI-assisted technologies in the preparation of the manuscript, where applicable. Authors remain fully responsible for the originality, accuracy, integrity, citations, analysis, interpretation, and conclusions of their work; Generative AI tools must not be listed as authors or co-authors. Example: “No Generative AI or Large Language Model was used to generate the scientific content, research data, analysis, interpretation, or conclusions of this manuscript.”

Ethics Approval and Informed Consent: For research involving human participants, personal or confidential data, vulnerable groups, or other activities requiring ethical oversight, provide information on ethics approval, including the name of the approving institution or ethics committee and the approval number where applicable. State whether informed consent was obtained from

participants, or whether the data were anonymized prior to analysis. If ethics approval was not required, this must be stated explicitly, e.g., “This study used anonymized transaction data and did not involve direct interaction with human participants; therefore, ethics approval and informed consent were not required.”

Data Availability: Describe whether and how the data, source code, or other materials supporting the findings can be accessed, including the repository name, link, DOI, or accession number, where applicable. If the data cannot be shared publicly due to privacy, confidentiality, or third-party restrictions, state the reason and the conditions for access. Example: “The data supporting the findings of this study are available from the corresponding author upon reasonable request, subject to permission from the data owner.”

REFERENCES

1. Successive quotes in brackets [1]. Sentence punctuation following bracket [2]. Refer only to reference numbers, as in [3] -Do not use "Ref. [3]" or "Ref. [3].
 2. Minimum bibliography is **10 citations** from **journals/research**, maximum published in the **last 5 years**.
 3. Mandatory to use Mendeley for citation purposes and bibliography (IEEE format). Mendeley can be downloaded at <https://www.mendeley.com/downloads>.

ARTICLE WRITING FORMAT OF JURNAL TEKNIK INFORMATIKA

I. GENERAL FORMAT

The writing is in English in at least 10 pages, typed using A4 size paper (210 mm x 297 mm) with two columns with top and bottom margins and right and left margins, 2.5 cm. In the middle of the first page contains the title of the manuscript. Under the title presented abstract and keywords from the abstract. Abstract typed using single space, and **Times New Roman font, 11pt**. Manuscripts submitted must be in the form of a **Microsoft Word** document.

I.1. Chapters and subchapters

The titles of chapters and sub-chapters are capitalized at the beginning of each sentence and followed by lowercase letters in bold.

I.2. Headers and footers

Avoid writing headers, footers or page numbering in the submitted manuscript. Page numbering will be added at the final stage of journaling.

I.3. Abbreviations and acronyms

Define abbreviations and acronyms at the beginning of paragraphs when they are used in sentences. Important abbreviations have been defined in the abstract. Other abbreviations such as IEEE, SI, MKS, CGS, AC, DC, RMS and other common abbreviations need not be defined. Abbreviations must be without spaces, for example "S. T." the correct one is "S.T.". Do not use abbreviations in titles, chapter titles or subsections, unless it is unavoidable. Terms that use a foreign language are written in *italic style*.

II. TABLES AND FIGURES

The table displayed should not be in the form of an image (jpg or png) so that the editing process can be carried out. Figures are titled with the initial words "Figure" and "Table" and are numbered, for example: Figure 1, Figure 2, Table 1, Table 2, and so on. Not allowed to write "Table below" or "Figure below". The Figure Title is placed at the bottom center of the image. The Table Title is placed in the top center of the table. Both figures and tables are centered between the right and left margins of the page. Tables or figures must be placed on the same page as the title of the table or figure. If the table or figure exceeds 1 page, it can be reduced in size.

Table 1. Centered, 8pt, and shows the table title (capital letters at the beginning of the sentence only)

Description	August	September
Title	Organic Chemistry	Classic Physics
Name	Ian Mahendra	Bambang JK
Address	Semarang	Kendal

Figure 1. The title of the image uses only capital letters at the beginning of the sentence and the image uses a high resolution that can be clearly seen (not broken or blurry)

III. EQUATION

When numbering an equation, put brackets and the number is placed to the right of the equation. Equations are mentioned in the discussion by writing Equation 1, Equation 2, and so on. Equations must be typed using Insert Equation in Microsoft Word, not images or inserts. Example:

$$Z = c^0 + c^1X^1 + c^2X^2 + c^3X^3 + c^4X^4 \quad (1)$$

IV. EXCERPTS/REFERENCES

Excerpts or references to other sources of writing put forward by the author in the body of the article must be adjusted to the references in the Bibliography, which are sorted by the appearance of the excerpts, not alphabetically. Reference sources are expected to be mostly primary sources, either in the form of journals or proceedings, with a minimum of 10 articles in indexed journals or national and international proceedings published in the last 5 years.

To make it easier, authors are required to use the facilities in the MENDELEY or ENDNOTE software as a reference manager. Authors can also use the REFERENCES menu and the BIBLIOGRAPHY submenu in Microsoft Word.

The excerpts number is placed in square brackets (IEEE format) as in the following example: [1]. The numbering follows the reference number written in the bibliography section. If you want to refer at the beginning of the sentence, please write only the number in square brackets then the statement follows, for example "[3] indicates that ...". If the statement mentioned first, then place the reference number at the end of the sentence, one space from the last sentence and end with a period without a name or anything. References referred to in the Bibliography must be more than 10 references.

Capital letters are only placed at the beginning of the sentence, except for the title of the manuscript, chapter and sub-chapter titles and symbols. For excerpts from articles in English, it can still be written in English, and written in *italic style*.
