

Sharon High School Science Course Sequence

- Students may move from honors to standard level or standard to honors level from one year to the next as readiness and interests change.
- Students may take a science course as an elective in the same year that they have another science course (doubling up is allowed subject to space availability).
- In an effort to allow all students to experience a well-rounded education and to balance course opportunities for all, one student may NOT take three science courses in one year.
