

# ZOOM0002\_TrLR

[00:00:00] **Man:** And then the seat belt over top, of course it's black strap steel buckle. So you can bolt that up for the whole flight. And, uh, in the event we need to get out of the airplane early, just let the airplane settle on the water. Undo the seat belt. Stand up with a life jacket and fasten it. Come out of the seat with the belt for ripping sound.

[00:00:17] And then make sure you get out before you inflate it. Do not inflate it inside the aircraft (plus airplane sound)

[00:00:22] the airplane. Sound of airplane taking

[00:00:27] **Man:** off. That's that big yellow tab there, give it a pull. And it'll fade up there, blow into that. Once it's inflated, just pull the black strap over your head. Okay? This one right down here, so you
