Help

← API ACCOUNTS

Create account

View and manage API accounts, which are used to connect to BigCommerce's Admin API and Stencil CLI. See details of webhooks associated with API accounts. Learn More

Token type

V2/V3 API token

Name

AdBeacon

API path

https://api.bigcommerce.com/stores/celxzlbfel/v3/

OAuth scopes

Which API resources does your app or integration require access to?
You can find more information on API resources here

Cancel   Save

Step 6:
Give the following scopes as given here…

Content ⇒ modify
Checkout content ⇒ modify
Customers ⇒ read-only
Information & settings ⇒ read-only
Orders ⇒ read-only
Order transactions ⇒ read-only
Products ⇒ read-only

After that hit the Save button and it gives you an access scope which can be shown only one time so copy that token.

Step 7:

After filling the details of store hash and access token in step 2 Add Script you can see two options. Auto Install and Manually Install.

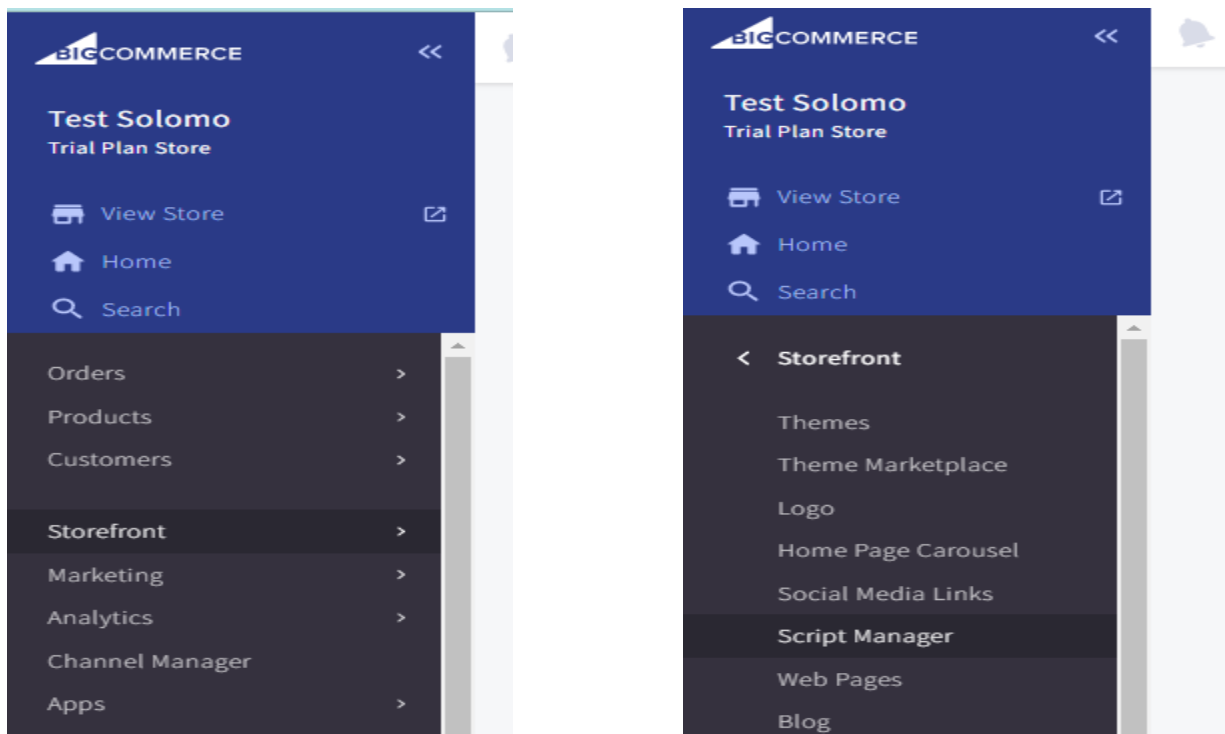

Step 8:

If you choose auto install then go with it.

Step 9:

If you choose manual installation then do these steps, Copy the script.
Under Admin panel sidebar click on Storefront ⇒ Script Manager

Step 10:
Click on **Create a Script** Button there.

Step 11:
Fill the details like
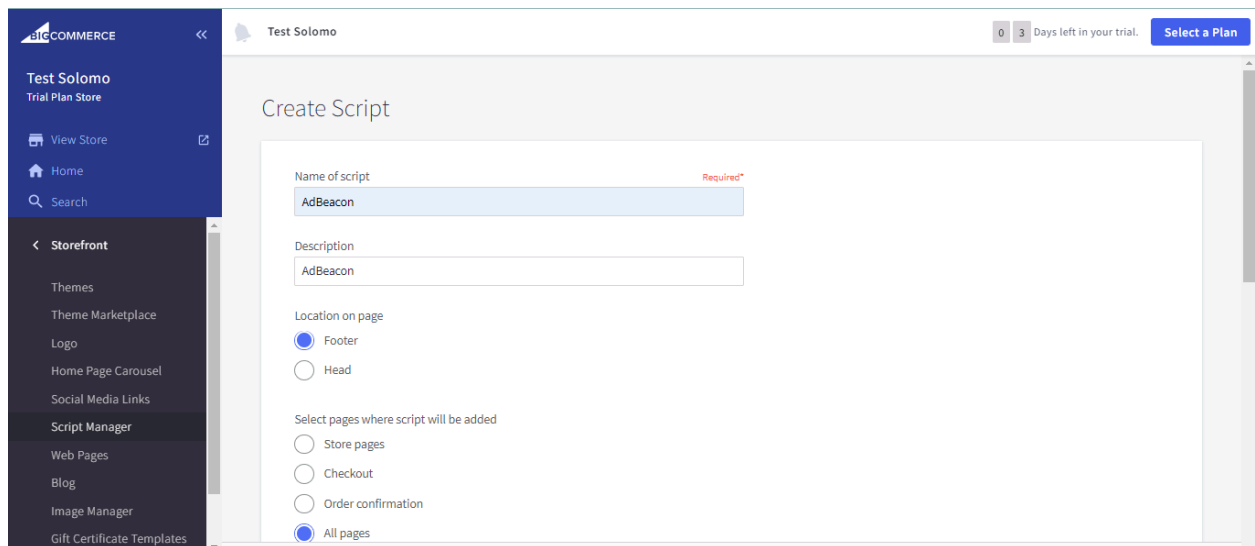

Name: AdBeacon
Description: AdBeacon Analytics
Location on page: Footer
Select pages where script will be added: All pages
Script category: Analytics
Script type: Script
Script contents: PASTE YOUR SCRIPT.

Script category

○ Essential
Essential for the site and any requested services to work, but do not perform any additional or secondary function.

● Analytics
Provide statistical information on site usage, e.g., web analytics so we can improve this website over time.

○ Functional
Enables enhanced functionality, such as videos and live chat. If you do not allow these, then some or all of these functions may not work properly.

○ Targeting; Advertising
Used to create profiles or personalize content to enhance your shopping experience.

Script type

○ URL
● Script

Script contents   Required*

```
1    <!-- AdBeacon -->
2    <script>
3    function adBeaconStartRenderingScript() {
4        let t = document.createElement("script");
5        t.src = "https://app.adbeacon.com/os/k6ct01tx21t13tz8?" + Date.now(),
6            t.async = !0,
7            document.head.append(t);
8    }
9    document.addEventListener("DOMContentLoaded", adBeaconStartRenderingScript);
```
