Our current rules stipulate the following:

Map Exploits - Boosts that include the use of clipping are strictly forbidden. The term “Clipping” defines that when a player is boosted can see through certain parts of the map (ie over/under walls, or through solid objects on the map).

- Pixel walks/illegal positioning - Defined separately from map exploits using clip brushes to stand or boost in locations unintended by the map design or out of bounds is forbidden (e.g. olofboost). "Saving" in these spots is also forbidden (e.g. below bridge/elevator shaft on de_vertigo).

This document is to help clarify spots that have been raised to the admin team and are deemed to be illegal as per the guidelines above. If you have any questions or a spot you are unsure of please head to discord.gg/epiclan and open a support ticket.

Note: This list is non exhaustive, if you have any queries, please ask

Vertigo

Any form of pixel walk in the Vertigo lift shaft

Any boost on top of A scaffolding

This boost varies between a pixel walk and out of bounds depending on where you stand, both spots are banned.
