

xPortal Enhances Solana Crypto-to-Cash Experience with New Ecosystem Integrations

Embargo Thursday, July 11, 4:00 PM CET time

Sibiu, Romania – July 11, 2024 – xPortal, the ultimate financial super app for everything money, developed by the MultiversX team, is thrilled to announce significant enhancements to its platform, aimed at elevating the Solana ecosystem experience for both new and existing users. These updates include the ability to top up xPortal Debit Cards with SOL, the listing of numerous SPL tokens, and the integration of leading SOL dApps in xPortal's Discover section, the app's multi-chain dApp hub. This development further cements xPortal's role as a unique bridge between the digital and physical worlds, facilitating seamless transitions from crypto to cash for holders of top cryptocurrencies such as Bitcoin (BTC), Ethereum (ETH), MultiversX (EGLD), Solana (SOL), and Polygon (MATIC).

Starting today, xPortal users can effortlessly top-up their xPortal Debit Cards with their SOL holdings. This new feature allows Solana enthusiasts to use their crypto for shopping easily and manage their finances quickly, making it simpler than ever to transition from digital assets to real-world spending power.

Additionally, xPortal now supports over 20 Solana-based SPL tokens, providing users with expanded opportunities to manage and interact with their favorite Solana assets. The new tokens available on xPortal include \$PYTH, \$IO, \$JTO, \$WIF, \$BONK, \$JUP, \$RAY, \$BOME, \$HNT, \$POPCAT, \$BEER, \$USDT, \$USDC, \$LINK, \$LDO, \$FTM, \$RPL, \$SUSHI, \$DADDY, and \$BODEN. This extensive list ensures that users can now enjoy a comprehensive Solana experience directly from the xPortal app, with more tokens being activated weekly.

The xPortal Discover section has also been enhanced with the addition of top-tier Solana decentralized applications (dApps). Users can now explore and interact with premier Solana dApps, including Jupiter Exchange, Raydium Protocol, and Kamino Finance.

Sergiu Biris, Head of Product at MultiversX and xPortal Lead, commented on the update: "These latest developments are a testament to our dedication to providing a complete experience for our users and represent a significant step forward in our mission to bring blockchain technology into the mainstream and make crypto payments the norm."

"We've spent considerable time equipping xPortal with a unique set of features that make it stand out: unmatched simplicity and ease of use, beautifully abstracted complexity, the ability to bridge physical and digital realms, and many others. We're excited to make access to all these features ecosystem-agnostic," Biris added.

About xPortal

xPortal is the preferred financial super app for more than 1.5 million global users, seamlessly bridging the gap between crypto and cash. xPortal offers intuitive financial tools like debit cards

and in-app crypto exchange, alongside innovative features such as augmented reality NFT experiences.

xPortal integrates blockchain technology with user-friendly design, empowering users to manage digital assets securely and interact with decentralized applications effortlessly. By providing debit cards and bridging the digital and physical worlds, xPortal transforms everyday financial management into a seamless, engaging experience, making it easy to transition from digital assets to real-world spending.
