

Who Are You?

What is Your Professional Persona?

LinkedIn Lab: As you start to develop your Personal Profile and “Personal Statement”, you should take an introspective look at yourself. This can be a little hard to do, and so to help with this task, you should try to answer the following prompts. You should try to answer these as if you are talking to your future hiring manager. What do you want them to know about you? Answer as if you were answering the questions as part of a job interview... If you could give the perfect answer, showing yourself in the best possible light, what would it sound like?

Please Answer The following 2 questions and then pick 1 more from the list below

1) Tell Me A Little About Yourself?

(This is a very open ended question, there is not a “right” answer, but rather an opportunity to tell a little about yourself)

<Type Your Answer Here>

2) You Are Taking Mechatronics Engineering, What Motivated You To Take That Class?

(This question is also very open ended, it is an opportunity to talk about why you might want to become an Engineer, and also to highlight any skills you already have)

<Type Your Answer Here>

Pick One More Question, or Make up you own

1) What Qualities Do You Think Make A Great Engineer?

(Like most interview questions, this one is also very open ended... You can really say whatever you want, and make it about you, and skills you have or are developing. Before you answer, you could take a look at this link “[Qualities of a successful Engineer](#)”

<Type Your Answer Here>

2) What type of Engineering work do you have the greatest passion for, and why do you enjoy it so much?

(Again, open ended...This is an opportunity to talk about the type of engineering they might be doing at a company you want to work for... you can talk about the type of work and why you would be good at doing it)

<Type Your Answer Here>

3) What would your ideal Engineering job be?

(Again, open ended...This is an opportunity to talk about the type of engineering they might be doing at a company you want to work for... you can talk about the type of work and why you would be good at doing it)

<Type Your Answer Here>

4) What local community or worldwide engineering challenge would you like to solve?

(Again, open ended...This is an opportunity to talk about the type of engineering they might be doing at a company you want to work for... you can talk about the type of work and why you would be good at doing it)

<Type Your Answer Here>

5) What are some of the challenges you have overcome and how has it made you a better Engineer (or Person)?
