

SPPB PBD Assistant Privacy Policy

Last updated: 12 October 2026

SPPB PBD Assistant is a third-party Chrome extension created by zfkong.RookieDev to help teachers enter PBD and UASA data in the SPPB portal. It is not affiliated with, endorsed by, or approved by the Ministry of Education Malaysia, MOE, or SPPB.

Information handled

The extension asks teachers to sign in with an email address and password through Supabase Authentication. The password is sent directly to Supabase only to authenticate the teacher and is not stored by the extension. Authentication tokens are stored locally in the browser so the teacher does not need to sign in repeatedly.

The extension reads and fills information displayed in the SPPB portal, such as student names, assessment values, scores, comments, and intervention information, only to perform the teacher-requested batch entry task. This information remains in the teacher's browser and is not sent to Supabase or to the developer.

How information is used

Email and authentication information are used only to verify access to the extension. The extension does not sell, rent, transfer, or use user information for advertising, profiling, lending, or any unrelated purpose.

Data security

Teachers should review all data before saving it in SPPB. The extension does not click Hantar automatically. Teachers remain responsible for using the SPPB portal and safeguarding their own account credentials.

Changes

This policy may be updated when the extension changes. The latest version is available at this [link](#).
