Pay: \$95,000 – \$105,000

Tlingit Haida Tribal Business Corporation (THTBC) is a family of 8(a), HUBZone, SDB, and other companies wholly- owned by the largest tribe in Alaska. Each of its wholly- owned 30+ subsidiaries are uniquely qualified to deliver value to its customers and teaming partners. For over 30 years, THTBC has operated as a trusted US Federal contractor throughout the US and worldwide. THTBC delivers outstanding service with innovative, low-cost contract solutions to all its public and private sector customers worldwide.

Scope of Work:

The purpose of this position is to oversee the overall operation of the Engineering Design team, which has responsibility for the engineering design and project management of the US Air Force Academy's (USAFA) facility and infrastructure construction program. This construction program exceeds \$80 million in annual renovation, sustainment, maintenance, repair, and new construction projects. These projects require collaboration with other sections/divisions/organizations including, Portfolio Optimization (planning & programming), Construction Management, CADD/GIS, Installation Management, Operations & Maintenance, Base Contracting, and other stakeholders. Includes a wide variety of duties related to both managing personnel (7 engineers, 2 architects, 1 interior designer, and 1 cost estimator) within the organization, ensuring completion of planned design projects, meeting monthly/annual performance standards, and design management as outlined in the USAFA Performance Work Statement (PWS).

Responsibilities:

Must maintain a strong and productive relationship with the USAFA's contracting office and government engineering counterparts to ensure smooth execution of projects.

Provides management oversight of projects to include, managing the design program, solving construction related problems, and performing complete reviews of design packages and contract modifications prior to submittal to Contracting for execution.

Ensures projects are identified, validated, approved, designed, and if funded, constructed. Works with Portfolio Optimization department to ensure designs meet USAFA's, cultural, environmental, and historic district requirements.

Ensures short- and long-term project plans are developed and follow agreed upon strategies to meet the needs of USAFA. Ensures that project designs meet energy conservation, sustainability and Unified Facilities Criteria (UFC) requirements.

Oversees Architect-Engineer (AE) design program and the preparation of Statements of Work (SOWs) for the AE designs and construction projects.

Ensures all work is performed in accordance with local Project Management Plans (PMPs), Quality Management Plans (QMPs), Standard Operating procedures (SOPs), and US Air Force requirements.

Managing department personnel ensuring maximum efficiency and compliance with PWS requirements. Ensures project execution in accordance with the government's budget and timelines.

Responsible for updating base leadership on design progress, construction execution and project modifications. Responsible for design/construction quality.

Coordinates support with other Civil Engineering divisions/sections.

Signs off on engineering project plans.

Ensures that all staff follow the latest documents and templates.

Manages, develops, and revises SOPs, project design templates, PMPs, QMPs, etc., as needed for the Engineering Design Department.

Provides the Civil Engineering Manager with reports on project status upon request.

Works with civil engineering personnel to create process improvements.

Promotes improvements in customer service and satisfaction.

Completes additional duties in direct support of departmental mission requirements as directed by the Civil Engineering Manager.

Minimum Requirements:

Must be vaccinated in accordance with all Executive Orders, Government mandates or requirements, contractual requirements, and company policy

Minimum of 10 years' experience with facilities/infrastructure design and construction with experience as an engineering manager or engineering supervisor.

Must be able to demonstrate proficiency in Microsoft products (Word, Excel, Power Point, etc.).

Understand, read, write, and speak fluent English.

Bachelor of Science degree Engineering or Architecture from an accredited institution.

Master of Science in Engineering Management preferred.

Registered Professional Engineer (PE) or Registered Architect (RA) licensed in the State of Colorado, or if registered in another state, able to obtain reciprocity registration for Colorado within six months.

Must possess and maintain a valid Colorado Driver's License.

Must be able to successfully complete a National Agency Check with Inquiries (Tier 1) background check.

Must be able to successfully complete a drug/alcohol test and a criminal record check.

Must have a safe driving record, as defined by Company policy, to operate a company vehicle.

Must have practical knowledge of worksite safety, occupational hazards and standard safety practices.

Must be able to work alternate shift schedules when necessary to meet the mission requirements of the customer, to include weekends and holidays.

Must be able to serve on the base's Emergency Operations Center as a representative for civil engineering.

Benefits:

THTBC offers eligible employees a comprehensive benefits package which includes:

Medical, dental, and vision coverage

Hospital Indemnity Plan

Company paid disability, basic life & AD&D

Employee paid voluntary life and AD&D for dependents

401(k) retirement plan

To perform this job successfully, an individual must be able to perform all the essential duties of the position satisfactorily. The requirements are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential functions. May be required to obtain and maintain a security clearance, including successfully completing a thorough background investigation.

THTBC is proud to be an Equal Opportunity Employer. Our hiring practices provide equal opportunity for employment without regard to race, religion, color, sex, gender, national origin, age, United States military veteran's status, ancestry, sexual orientation, marital status, family structure, medical condition including genetic characteristics or information, veteran status, or mental or physical disability so long as the essential functions of the job can be performed with or without reasonable accommodation, or any other protected category under federal, state, or local law.

WebsiteTHTBCTlingit Haida Tribal Business Corporation

Subsidiary: KIRA Global Services

Job Title: Security Guard

Job Location: Juneau, AK

Labor Category: Non-Exempt

Clearance Requirement: N/A

Travel Requirement: N/A

Tlingit Haida Tribal Business Corporation (THTBC) is a family of 8(a), HUBZone, SDB, and other companies wholly- owned by the largest tribe in Alaska. Each of its wholly- owned 30+ subsidiaries are uniquely qualified to deliver value to its customers and teaming partners. For over 30 years, THTBC has operated as a trusted US Federal contractor throughout the US and worldwide. THTBC delivers outstanding service with innovative, low-cost contract solutions to all its public and private sector customers worldwide.

Scope of Work:

The security guard is responsible for the protection, safeguarding, and security of assets and others assigned to the site. Duties will include guiding and controlling traffic, provide safe crossing for pedestrians and assist visitors to the facility. This position is part-time and will have a rotating schedule. Patrol is performed at various work sites and include patrol inside and outside of the facility.

Responsibilities:

Performs routine patrol of assigned site to deter, detect, and report security or safety problems, preserve order, and protect property. Patrols may be performed on foot or by vehicle.

Performs patrol duties according to security policies and procedures and the client's specific instructions.

Corrects unsafe conditions which may pose risk of injury or death to people at the site.

Completes forms and reports which may include Incident Reports, Citizen Arrest Forms, and Criminal Trespass Forms.

Notifies local Emergency response agency in the event of an emergency. Maintains order at the site until their arrival and renders basic first aid or CPR as needed.

Protects the interests and property of client.

Approaches unauthorized persons on site to determine their intentions. Warns persons of rule infractions or violations and follows security policies and procedures.

Monitor traffic flow at assigned location to locate safe gaps through which pedestrians can cross streets, then guide or control the vehicular and pedestrian traffic.

Directs actions of pedestrians and traffic at intersections.

Directs movement of traffic through site, using signs, flags, and hand signals.

Assist visitors to the facility.

Performs other incidental and related duties as assigned.

Minimum Requirements:

High School Diploma or General Equivalency Diploma (GED).

Six (6) months of experience dealing with the public.

Ability to obtain a Security Guard license issued by the State of Alaska.

Ability to obtain basic first aid and CPR certification within three (3) months of hire.

Valid driver's license and clean driving record.

Ability to use good judgment when making decisions within the scope of authority.

Establish and maintain working relationships with others on the site.

Ability to work directly with the public, convey information, and assist visitors to the facility.

Knowledge of safety and security issues related to pedestrian and vehicular traffic.

Ability to meet physical requirements of the position such as walk, stand, step up and down from the curb, run and climb stairs as required.

Benefits

THTBC offers eligible employees a comprehensive benefits package which includes:

Medical, dental, and vision coverage

Hospital Indemnity Plan

Company paid disability, basic life & AD&D

Employee paid voluntary life and AD&D for dependents

401(k) retirement plan

8.Engineering Tech V – CNC Machinist - Greenbelt, MD

Full Time8800 Greenbelt Road, Greenbelt, MDPosted 20 mins ago

Tlingit Haida Tribal Business Corporation

WebsiteTHTBCTlingit Haida Tribal Business Corporation

Subsidiary: KIRA Government Services

Job Title: ENGINEERING TECHNICIAN V – CNC Machinist

Job Location: NASA Goddard- Greenbelt, MD

Labor Category: Non- Exempt – CBA

Clearance Requirement: N/A

Travel Requirement: 10%

Tlingit Haida Tribal Business Corporation (THTBC) is a family of 8(a), HUBZone, SDB, and other companies wholly- owned by the largest tribe in Alaska. Each of its wholly- owned 30+ subsidiaries are uniquely qualified to deliver value to its customers and teaming partners. For over 30 years, THTBC has operated as a trusted US Federal contractor throughout the US and worldwide. As a Native Alaskan, Tribally- Owned business, THTBC has a competitive edge unique in the US Federal Government contracting space, including access to US Government directed sole source contracts. THTBC delivers outstanding service with innovative, low-cost contract solutions to all its public and private sector customers worldwide.

THTBC is proud to be an Equal Opportunity Employer. Our hiring practices provide equal opportunity for employment without regard to race, religion, color, sex, gender, national origin, age, United States military veteran's status, ancestry, sexual orientation, marital status, family structure, medical condition including genetic characteristics or information, veteran status, or mental or physical disability so long as the essential functions of the job can be performed with or without reasonable accommodation, or any other protected category under federal, state, or local law.

Scope of Work:

Performs multiple routine and non-routine complex tasks. Operates, demonstrating full competency on conventional and CNC equipment and machine tools such as lathes, drill presses, and milling machines. Plans, programs, and carries out operations needed to produce complex prototype pieces that meet precise specifications. Predominantly programs and operates 5 axis high-speed machines. Experienced in Mastercam and Vericut. Must be able to operate Fanuc, Haas, Mazak and/or Mikron machining centers Applies knowledge of working properties of metals (including, but not limited to aluminum, stainless steel, brass, copper, and exotic metals. Performs non-routine assignments and assists in setting group goals and plans to carry them through. Selects and adapts procedures to current assignments with only initial instructions. Receives technical advice when needed and performs under minimal supervision. May cross-train and/or support other duties associated within area of assignment as directed by lead personnel or supervision.

May direct others while leading tasks or be assigned as an alternate or primary Leader (if qualified) when directed by ETIS management. Will delegate, manage and monitor assigned tasks.

Responsibilities:

Primary duties are to independently and with minimal direction operate conventional and CNC equipment and machine tools. This will include producing precision complex prototype pieces that meet precise specifications from drawings and flight hardware per project requirements. Must be able to accurately use measuring equipment; geometric dimensioning and tolerancing using precision equipment, and read, interpret and follow written procedures and simple technical drawings and other routine tasks as directed by lead personnel or supervision. May also be requested to train entry level technicians as directed and support fabrication.

Predominantly experienced in Mastercam and Vericut.

Must be able to operate Fanuc, Haas, Mazak and/or Mikron machining centers

Applies knowledge of working properties of metals (including, but not limited to aluminum, stainless steel, brass, copper, and exotic metals).

May be cross-utilized and cross-trained to support other groups to develop overlapping workforce.

May operate conventional and CNC equipment and machine tools such as lathes, drill presses, and milling machines.

Minimum Requirements:

Must be vaccinated in accordance with all Executive Orders, Government mandates or requirements, contractual requirements, and company policy

Education – High School diploma or GED is required. Minimum of 10 years direct experience in programming in a CNC machine shop environment required. Must be proficient in the operation of conventional and CNC equipment including turning and/or milling centers.

Must be experienced in the use of measuring equipment; geometric dimensioning and tolerancing; and working with engineering drawings and electronic files.

Experienced in Mastercam and Vericut.

Must be able to operate Fanuc, Haas, Mazak and/or Mikron machining centers

Ability to follow verbal and written instructions from engineering or supervision.

Ability to use own judgment and decisions to allow continuity of workflow.

Must be self-motivated and a “Team Player” with good interpersonal and communication skills.

Must be able to organize time and assignments to properly prioritize efforts for maximum effectiveness.

Must be capable of passing required physical examinations and successfully completing the following training: hazard communication, personal protective equipment, IT security and other required training or certifications as directed by ETIS management.

To perform this job successfully, an individual must be able to perform all the essential duties of the position satisfactorily. The requirements are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential functions. May be required to obtain and maintain a security clearance, including successfully completing a thorough background investigation.

If you need a reasonable accommodation for any part of the employment process, please contact us and let us know the nature of your request. Requests for accommodation will be considered on a case-by-case basis.

10. Database Management Analyst LEAD or MID (SECRET req'd) (Remote or Yorktown, VA)

Date: Thu, 2 Jun 2022 13:54:34 +0000
From: Rachel Strauch <rachel.strauch@innovatus-tech.com>
To: zak <zak@specopsnet.org>

Zak, please can you post this announcement also? Thank you!!! Rach

*** (APPLY BY 6 JUNE 2022, DoD SECRET, Yorktown Virginia or remote DOE) ***

POC: Rachel.strauch@innovatus-tech.com 703-357-7512

Innovatus Technology Consulting is an established government and commercial consulting firm with ten years of specialization in information technology advisory services and cloud computing. We are looking for a mid-career SECRET-cleared Database Analyst to work full-time remotely or partially remotely depending on experience for NAVSEA's SLDCADA program based in Yorktown, Virginia.

SLDCADA is a highly protected yet unclassified, web-based, customizable time and attendance (T&A) and labor reporting system providing a single input screen via a single sign on capability utilizing Common Access Card/Public Key Infrastructure (CAC/PKI)-based login functionality. SLDCADA currently provides T&A capabilities and labor reporting services to more than 60,000 users. SLDCADA is a Java-based application running on an Oracle 19c database platform with production, development, and test environments located in the Amazon Web Services (AWS) cloud environment. The Data Center and Cloud Hosting Services (DC2HS) acts as the Navy Cloud Broker, providing an Infrastructure as a Service (IaaS) environment to the SLDCADA Program.

Our chosen candidate will join our team to support the SLDCADA program with the following main tasks of responsibility:

- Administer, test, and implement computer databases, applying knowledge of database management systems.
- Coordinate changes to computer databases.
- Plan, coordinate, and implement security measures to safeguard computer databases.

- Maintain databases within an application area, working individually or coordinating database development as part of a team.

Credentials Required for the Job:

- Excellent analytical, critical thinking, and data mining skills
- Excellent oral and written skills.
- Proficient in Microsoft applications such as Word, Excel, PowerPoint, and Outlook.
- Ability to work independently and as a team member.
- Ability to learn and apply technical concepts to assigned duties.
- Ability to explore and examine data from multiple disparate sources with the goal of drawing conclusions to address business problems.

Linux certificate or program training and experience required, and Security+ preferred

What We Offer:

Benefits: Innovatus offers a plan that supports 70% medical/dental/vision premium as well as national pharmaceutical drug coverage, possibly relocation or signing bonus, three (3) weeks paid time off, commuter benefits, HSA/FSA, 401K, performance bonuses, an employee referral program, and the opportunity to craft your career with us. Additionally, you can count on Innovatus supporting your continuing education and certifications. We require that our team continuously trains to maintain skillsets and stay up to date on developments in industry and with technologies.

Advancement: While Innovatus Technology Consulting is one of San Diego's fastest growing information technology consulting having won several sizeable long term contracts, we continuously evaluate our growth plan carefully against business sustainability. Accordingly, the opportunities to advance in an established and secure firm exist with good performance at Innovatus.

We reward innovation and autonomy, and love to support passions that our employees have. We hope you will consider a career with us at Innovatus Technology Consulting on the (contract team name) team. Please apply immediately if interested or email rachel.strauch@innovatus-tech.com with any questions or concerns. Thank you!

More About Us:

Innovatus Quality:

Innovatus Technology Consulting is committed to providing clients with technology products, services, and frameworks that ensure and support the success of their mission. Our clients are at the forefront of everything we do. From the moment we design and develop our proposal response onwards, our aim is to provide immediate, impactful value. We see things from our clients' perspective, put ourselves in the trenches alongside them, and regularly solicit feedback to ensure their satisfaction. This commitment to quality includes considerations involving ISO certification standards, statutory and regulatory requirements, best practices, and our own desire to continuously improve.

Innovatus Areas of Expertise:

Innovatus provides multi-disciplinary information technology expertise in program management, program engineering management, systems engineering with a specialization area in sensors, integration, test, and evaluation, mission assurance, software engineering, Risk Management Framework and cybersecurity support. Innovatus delivers network and security architecture, network infrastructure, cyber security, Risk Management Framework (RMF) support, data center design and architecture, cloud migration support services, systems engineering, information technology project management, and service desk services to the Government. We specialize in managing on-premises workloads, preparing systems to migrate to cloud environments, cloud architecture and engineering support, and workload migration to DoD systems. We work with Defense Information Systems Agency (DISA) Security Technical Implementation Guide (STIG) and Security Content Automation Protocol (SCAP) compliant scanners to review and assess new requirements and determine how they may or may not impact information technology systems. We work to deliver processes and products that ultimately improves the work environment.

Certifications:

We are a fully certified and registered GSA Advantage! Contract Holder, SBA 8(a), Service-Disabled Veteran-Owned Small Business (SDVOSB), a Minority Business Enterprise (MBE), and are honored to have a VETBIZ Certification as well.

Very Respectfully,

Rachel

11. Senior WiFi Engineer (Washington DC) (TS Clearance with SCI Eligibility Req'd)

Interested in Consideration? Please forward Resume to jwhipple@microtech.net

Senior WiFi Engineer(TS Clearance with SCI Eligibility)- Washington, DC

Overview

Provide senior level support for a broad user base across multiple Government agencies and a variety of missions. The primary focus of this requirement is to support the Wireless Local Area Network (WLAN) services utilized by the majority of the approximately 10,000 users across the country and around the world. The contractor shall provide senior support to design, implement, maintain, and resolve issues related to the Agency's WLAN and other emerging wireless technologies. The contractor shall provide support services to meet the Agency's mission of providing premier enterprise wireless services that are available worldwide 24 hours a day, 7 days a week, and 365 days per year. This task area may be subject to non-standard work hours and approximately two (2) after hours on call support per week.

Qualifications

Required:

- BA/BS in Engineering or IT related discipline. (Relevant experience can be substituted for education)
- Minimum 8 years of relevant experience supporting projects of similar size, scope and complexity.
- Demonstrated experience with LAN and WLAN administration with a focus on mobility and optimization of a wireless environment with an ever-changing amount of SSIDs to support changing missions.
- Demonstrated experience in managing, designing and implementing Access Points, Antenna design, Aruba Networks Wireless Controllers, and Aruba Networks Airwave.
- 8140/8570 IAT II compliant.
- ACMP and/or CCNP Wireless Certification
- TS clearance with SCI eligibility

Highly Preferred in priority order:

- CCNP certifications:
 1. Enterprise Infrastructure
 2. Service Provider
 3. Data Center

4. Security

- CCNA certification

16. Senior Aviation ISR SME (Pentagon, Arlington, VA) (TS/SCI Req'd)

Senior Aviation ISR SME

Apply Here: [Recruitment \(adp.com\)](#)

The Challenge:

Critical decisions are made every single day in aligning our military forces for the future operating environment. What if you could use your Department of Defense (DoD) operational experience and knowledge to assist those efforts?

The DoD is advancing its Intelligence, Surveillance, and Reconnaissance (ISR) capabilities, with a specific emphasis on providing processes and services to leverage the innovation ecosystem and exploit emerging DoD Information Environment Enterprise capabilities to bolster the Intelligence Warfighting function. As an Aviation ISR SME, you can use your functional experience and relevant skills to assist in the ongoing ISR development process while supporting our warfighters, protecting our national security, and informing our nation's leaders.

Build Your Career:

At JCTM, we know the power of knowledge and experience combined with integrity. When you join JCTM, you are joining a team that empowers their people, does what is right, and believes that every 'JCTMer' has a role in helping manage our culture.

Challenging projects – As a Senior Aviation ISR SME on our team, you will explore, evaluate, and coordinate for the demonstration of emerging aviation ISR sensor and sensor processing capabilities. You will interact with a broad cross-section of operating forces, force development organizations, and the innovation ecosystem to gain insights regarding operational needs and emerging solutions. You will advise program leaders and draft policy, plans, and strategies to guide the integration of aerial ISR capabilities and resulting data within relevant operating concepts, programs, and systems.

Meaningful work – Use your skills, knowledge, experience, and drive to empower change within the United States DoD, the Intelligence Community and our country. Your work will directly support the safety and security of our Nation's service members.

State-of-the-art technology – Broaden your capabilities while working directly in support of the DoD optimizing emerging technologies and methodologies for successful employment at multiple echelons.

New skills – Alongside a myriad of both technical and functional experts, you can gain practical experience with advanced technologies, emerging tools and concepts, and strategic level implementation.

Room to grow – You'll be inspired to grow your career and become a key contributor to the company's processes and strategic goals through your alignment with mentors and collaborative colleagues.

You Have:

Active TS/SCI clearance

*Bachelor's level or higher degree from an accredited institution in a relevant field or discipline
10+ years of multi-int intelligence experience; Marine Corps operations and emerging operating concepts experience preferred

Intimate knowledge of DoD ISR operations at various levels of command

Ability to be self-motivated, applying initiative and judgment to work independently as well as in a team environment

Ability to adapt to changing situations

Possession of excellent oral and written communication skills

Possession of excellent interpersonal skills to interact with all levels of client and mission partners

*Experience may substitute for education requirements for this role.

Nice If You Have:

Graduate Degree from an accredited institution in a relevant field or discipline

20+ years of DoD intelligence experience

Experience with the DoD requirements development process

Experience in the integration and/or employment of rapidly developed prototypes to include AI/ML in military or intelligence applications.

Expertise in application or employment of remote sensing and PED for multi-spectral FMV, SAR, and SIGINT data types and sensor modalities, as well as automatic tracking and correlation and/or fusion of remotely sensed data

Intimate knowledge of USMC aviation and ISR operations at various levels

Experience in development, coordination, and staffing plans and policy for DoD intelligence

Experience with proposal writing and project management

Understanding of current Marine Corps operating concepts and Force Design

Experience with Scaled Agile Framework (SAFe) style of task tracking through Confluence/JIRA or similar application.

Clearance:

Applicants selected will be subject to a security investigation and must meet eligibility requirements for access to classified information; TS//SCI clearance is required.

JCTM is an EOE that empowers our people to fearlessly drive internal and external change while supporting the safety and security of our great nation.

21. Deliverables Lead – Fayetteville, NC – Secret Clearance

R0140770 Deliverables Lead – Fayetteville, NC – Secret Clearance

Job Description Summary

Assists Program Manager with the research and development of projects within a corporate program. Applies advanced consulting skills and/or extensive technical expertise; full industry knowledge. Develops innovative solutions to complex problems. Works without considerable direction; mentors and may supervise team members. Bachelors degree and 5+ years directly related experience or Masters degree and 3+ years directly related experience. Years of

experience may be accepted in lieu of degree for certain roles. Certifications may be accepted in lieu of a degree for certain technical roles.

Job Description

Job Description

The Challenge:

As a deliverables manager, you'll implement and maintain organizational programs in support of a billion dollar task order. You'll work with program leadership to oversee daily operations to support a SharePoint deliverables management system, summarize key performance metrics for the deliverables management system, and provide trend and performance data to the task order. This is a chance to directly impact a meaningful mission, while growing your skills in program strategy. Work with us and as we support our industry partners to ensure warfighters are informed, equipped, trained and ready to combat emerging global threats.

Join us. The world can't wait.

You Have:

- Experience with task order delivery, planning, and process development
- Ability to write and edit documents clearly and effectively
- Ability to identify potential problems and develop mitigation strategies
- Ability to communicate and work in a flexible environment with minimal oversight
- Ability to lead cross-functional project teams
- Secret clearance
- Bachelor's degree
- Project Management Professional (PMP) Certification

Clearance:

Applicants selected will be subject to a security investigation and may need to meet eligibility requirements for access to classified information; Secret clearance is required.

Build Your Career:

Consulting at Booz Allen means empowering you to provide your customers with the best support. With a consulting career at Booz Allen, you'll have access to:

- a large business consulting community
- experts in virtually every field
- a culture that focuses on supporting our employees

Orbis Operations is seeking a Counterintelligence Officer to support a client's operational requirements in the Washington DC area. The position requires an active Top Secret and Sensitive Compartmented Information (SCI) eligibility with a polygraph. Successful candidate will work well in team environments and will be capable of operating independently with minimal supervision. Candidate will interact with customer personnel at all levels within the customer organization. The position requires experience as a Counterintelligence Officer and prior experience supporting HUMINT operations.

JOB DESCRIPTION: The primary function of a Counterintelligence Officer is to identify, monitor, and assess the efforts of foreign intelligence entities attempting to collect sensitive information on the organization's personnel, methods, plans and operational efforts, including the threats posed by emerging technologies. Daily activities include:

Evaluate and interpret all-source information concerning counterintelligence, counter terrorism, counter espionage, threats against customer personnel, programs, information systems and/or facilities.

Conduct internal and external liaison activities.

Conduct counterintelligence investigations/inquiries and prepare formal reports of findings and recommendations.

Prepare and conduct tailored briefings and debriefings.

Conduct counterintelligence damage assessments and advise on counterintelligence operations.

REQUIRED EDUCATION/SKILLS:

TS/SCI with Polygraph and 7 years of experience as a Counterintelligence Officer and prior experience supporting HUMINT operations.

Bachelor's Degree

PREFERRED QUALIFICATIONS:

Ability to plan and organize tasks independently

Exercise sound operational judgment

Strong written and oral communication, organization, and interpersonal skills

Ability to pose creative solutions to operational challenges

Orbis Operations is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, or protected veteran status.

23. Staff Operations/Desk Officer (DC Metro Area) (TS/SCI w/ Poly)

*Ideally we are looking for backgrounds and exposure running or supporting clandestine operations in a non-wartime environment. Interagency coordination preferred. Polygraph clearance and degree are required.

Staff Operations Officer

Orbis Operations is a leading Irregular Warfare training and consulting firm supporting the US Department of Defense and Intelligence Community as well as commercial clients.

Orbis is currently seeking a full-time Staff Operations Officer (SOO) to support a client's operational requirements in the DC area. The position requires an active Top Secret and Sensitive Compartmented Information with a polygraph examination. Successful candidate will work well in team environments and will be capable of operating independently with minimal supervision. Candidate will interact with customer personnel at all levels within the customer organization. The position requires prior experience supporting HUMINT operations and the Intelligence Community.

JOB DESCRIPTION: The primary function of a SOO is to manage the two-way dialogue between the client and offices in the field necessary to drive operations to success. In addition, they provide operational guidance and operational case management and are responsible for program management, from traditional operational activities to specialized operations. SOOs will utilize customer-specific databases to conduct multiple layers of research and write summaries, reports, official correspondence, and guidance. Daily activities include:

- Manage a full range of operational and support activities for overseas missions
- Serve as the primary point of contact for a volume of ongoing cases
- Provide operational guidance for ongoing cases, ensuring any CI issues are identified to protect the client's personnel and facilities
- Design particular classified activities, propose recommendations, and identify the pros/cons of possible operational scenarios
- Coordinate legal and policy issues affecting cases
- Provide briefings on cases to senior customer officials, identifying potential issues on cases

Additionally, officers will provide a limited amount of administrative assistance in support of team personnel. Candidates will be expected to demonstrate proficiency in classified databases and develop relationships with various operational components to meet the client's requirements.

REQUIRED EDUCATION/SKILLS:

TS/SCI with Polygraph and prior experience in supporting HUMINT operations.
Bachelors degree required

PREFERRED QUALIFICATIONS:

SOO Certification a plus
Ability to plan and organize tasks independently

Exercise sound operational judgment
Strong written and oral communication, organization, and interpersonal skills
Ability to pose creative solutions to operational challenges

Orbis Operations is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, or protected veteran status.

24. HUMINT Collection Management Officer (DC Metro Area) (TS/SCI w/ Poly)

*Ideally we are looking for backgrounds and exposure running or supporting clandestine operations in a non-wartime environment. Interagency coordination preferred. Polygraph clearance and degree are required.

Collection Management Officer

Orbis Operations is a leading Irregular Warfare training and consulting firm supporting the US Department of Defense and Intelligence Community as well as commercial clients.

Orbis is currently seeking a full-time Collection Management Officer (CMO) to support a customer's operational requirements in the DC area. The position requires an active Top Secret and Sensitive Compartmented Information with a polygraph examination. Successful candidate will work well in team environments and will be capable of operating independently with minimal supervision. Candidate will interact with customer personnel at all levels within the customer organization. The position requires prior experience as a CMO and experience supporting HUMINT operations.

JOB DESCRIPTION: The primary functions of a CMO is to actively manage the two-way dialogue between the intelligence organization and intelligence consumers, establish and identify intelligence collection requirements, and evaluate intelligence to ensure collection is providing US foreign policy and national security decision-makers with timely, accurate, clear, and concise reporting. CMOs also provide detailed knowledge of cases and demonstrate objective analysis to specific operations that result in assessments and recommendations for collection requirements and operational testing methodology. CMOs will utilize client-specific databases to conduct multiple layers of research and write summaries, reports, official correspondence, and guidance. Daily activities include:

Guide intelligence collection and dissemination by serving as the bridge between the client and intelligence community

Draft questions and areas for follow-up and work with the client to draft reports that convey the information accurately and clearly

Provide operational guidance for ongoing cases, ensuring any CI issues are identified to protect the client's personnel and facilities

Establish and identify intelligence collection requirements, validate sources and evaluate intelligence production

Provide briefings on cases to senior officials and identifying potential issues

REQUIRED EDUCATION/SKILLS:

TS/SCI with Polygraph and 3 years of experience as a Collection Management Officer and prior experience supporting HUMINT operations.

Bachelor's degree is required

PREFERRED QUALIFICATIONS:

CMO Certification is a plus

Ability to plan and organize tasks independently

Exercise sound operational judgment

Strong written and oral communication, organization, and interpersonal skills

Ability to pose creative solutions to operational challenges

25. HUMINT Targeting Officer (DC Metro Area) (TS/SCI w/ Poly)

*Ideally we are looking for backgrounds and exposure running or supporting clandestine operations in a non-combat environment. Interagency coordination preferred. Polygraph clearance and degree are required.

Targeting Officer (HUMINT)

Orbis Operations is a leading Irregular Warfare training and consulting firm supporting the US Department of Defense and Intelligence Community as well as commercial clients.

Orbis Operations is seeking a full-time Targeting Officer to support a client's operational requirements in the DC area. The position requires an active Top Secret and Sensitive Compartmented Information with a polygraph examination. Successful candidates must work well in team environments and will be capable of operating independently with minimal supervision. Candidates will be expected to effectively interact with customer personnel at all levels within the customer organization. The positions require prior experience in supporting HUMINT operations or familiarity with the Intelligence Community and its objectives.

JOB DESCRIPTION: The primary functions of Targeting Officers are to plan and implement intelligence collection, and counterintelligence operations against priority HUMINT targets. Additionally, Targeting Officers identify leads and empower core collectors by producing detailed targeting packages through the use of sophisticated analytical tools and in-depth analytical skills, knowledge and experience. Daily activities include:

- Review operational traffic for intelligence leads
- Draft comprehensive targeting packages in support of the client's objectives
- Engage operational components within the customer organization to address targeting requirements and develop new leads for operational exploitation

Conduct detailed searches on items of operational interest and relay pertinent data to relevant customer components

REQUIRED EDUCATION/SKILLS:

TS/SCI with a polygraph and experience related to intelligence research and targeting work is required.

Bachelor's degree is required.

Demonstrate regional and/or functional expertise or a working knowledge of geographic regions of interest to the United States, including the Middle East

PREFERRED QUALIFICATIONS:

Ability to plan and organize tasks independently

Exercise sound operational judgment

Strong written and oral communication, organization, and interpersonal skills

Ability to pose creative solutions to operational challenges

26. IT & Engineering Lead/Director (McLean, VA/remote)(Clearable)

We are looking for an Information Technology & Engineering Lead/Director for a partial telework role in McLean, VA. No clearance required initially, but must be clearable. Most likely will have direct reports as the team continues to grow.

Summary:

High-quality, efficient, interoperable, and secure information systems, technology, and applications are key to modern operations. The position as an Information Technology Director requires uncommon and recognized knowledge, skills, and experience in a field of expertise and judgment that is accorded authority and status by peers or the public. Expert knowledge and skills are needed to satisfy an emerging and full-time requirement. The position will contribute by mentoring, leading, overseeing, directing, and managing Orbis Information Technology services and key initiatives. This new position represents an investment that the organization is making in bringing Information Technology expertise internally as a key foundational investment as the firm grows and acquires other companies. Partial telework option available.

Major Duties:

Information Technology Services: Incumbent shall be responsible for providing, securing, and managing the information technology services necessary to support Orbis Operations business requirements. Emphasis will be placed on the use of highly available and secure services with global reliability, and where appropriate well-managed and well-configured software-as-a-service (SaaS) will be the first choice. Incumbent must facilitate IT standardization and integration while enabling and catalyzing the implementation of solutions using the best available commercial technologies and practices.

Ongoing Modernization: Incumbent shall identify emerging requirements, understand the potential and emerging technologies that can meet those requirements, and find ways to provide them to the organization securely and seamlessly. Looking toward future growth and investment, the incumbent must champion the ongoing evolution of reliable, capable, and secure information systems, applications, and communication systems.

Communications: Incumbent manages complex stakeholder environments, providing world-class technical expertise, advice, and solutions to a variety of internal customers. Must be able to effectively communicate with and explain technology efforts to a range of people spanning experts to political leaders. Expertise in building partnerships with leadership to recommend and implement technology approaches for issues of significance.

Customer Solution Delivery: Incumbent uses their expertise to champion the use of modern technology development and management approaches, drawing heavily upon best practices from the technology industry such as open-source and agile development. The incumbent uses their deep understanding of the characteristics of successful digital services and how they are built both inside and outside governments, including user-centered design and development practices to lead major initiatives, deliver excellent products and services, and optimize operations.

Solution Analysis: Expertise in understanding a range of qualitative and quantitative analysis for the assessment of user needs, resource prioritization, and program direction. Familiarity using analysis and experience to support efforts to re-design key business processes in order to increase efficiency and improve user experience. Incumbent plans and executes an iterative strategy for scaling capabilities, capacity, and expertise from startup phase to mature. Ability to lead complex initiatives from conception through implementation.

Technical Talent Management: As Orbis grows, incumbent contributes to a talent strategy designed to bring the skills and resources needed to provide IT that supports agile, secure, and effective operations. Incumbent will lead additional IT resources and/or external contractors as required.

Collaboration with Other Experts: Incumbent works with other recognized technical experts across the organization, as well as individuals throughout private industry to solve technical problems and improve the quality of digital services provided to customers. Plans and conducts trailblazing work in the development, deployment, and use of technology that supports, drives, and furthers Orbis Operations business.

Technical Skills: Looking for familiarity with GSuite/Google for Business, Office 365, IdM, OAuth, SSO, DNS, system administration, networking, and hardware imaging.

Performs other duties as assigned.

Orbis Operations is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, or protected veteran status.

Please reach out to me directly with any interest:

29. Sr. Publicly Available Info (PAI) Intel Analyst (Ft. Bragg, NC) (TS/SCI - req'd)

If you meet the qualifications, please submit your resume to Preting Recruiting team at careers@preting.com. We will respond accordingly.

Must have active DOD TS/SCI clearance for us to review and respond.

www.preting.com/careers/

Job Title: Publicly Available Information (PAI) Intelligence Analyst - Senior

Location: Ft. Bragg, NC

Security Clearance Required: TS/SCI

Job Description: Preting seeks exceptionally qualified Intelligence Analysts (IA) to support USSOCOM.

Intelligence Analysts responsible for researching, developing, and presenting intelligence products at the operational level for senior leaders including: CT and regional analysis, GEOINT, HUMINT, SIGINT, OSINT/PAI, political/military analysis and support to targeting. Intelligence analysts shall interface with other intelligence organizations to fully prepare teams for exploitation of enemy personnel, as well as prepare post screening analytical products and assessments supporting targeting efforts, and threat analysis. Intelligence Analysts are responsible for the production of intelligence assessments and products in support of deployed SOF Task Forces to enable the F3EAD targeting cycle.

Employees must maintain global readiness and be available to deploy on a no-notice basis to hazardous duty/combat zones. Deployments may be to a theater of operations with permissive, uncertain, or hostile environments while living in austere conditions for extended periods.

Job Responsibilities: Senior-Level Publicly Available Information (PAI) Analyst shall have advanced targeting skills and firsthand experience targeting networks, individuals within networks, and identifying vulnerabilities for exploitation. Intelligence analysts shall have a deep understanding of the F3EAD targeting cycle as well as the current data, tools, and techniques used for each phase of targeting. Advanced Microsoft Office skills and proficiency using current analytic tools, databases and Intelligence and operational systems is required.

PAI Analysts are responsible for researching, developing, and presenting PAI intelligence products at the tactical and operational. PAI Analysts shall research emerging open source and social media applications of social networking, collaborates with industry and academia subject matter experts, and interfaces with other Government agencies to identify new and emerging social network analysis methodologies, techniques and analytical tools. PAI Analysts shall also identify and support the collection of open source data to support multi-intelligence fusion analysis in a collaborative environment.

Job Requirements: Senior-Level Publicly Available Information (PAI) Analyst shall possess the following qualifications:

- Minimum of eight (8) years analytical experience within DoD or equivalent Government agencies required, with five (5) years at the operational level.

30. Intel Discipline Lead Subject Matter Expert (IDL SME) (NCR) (TS/SCI - req'd)

If you meet the qualifications, please submit your resume to Preting Recruiting team at careers@preting.com. We will respond accordingly.

Must have active DOD TS/SCI clearance for us to review and respond.

www.preting.com/careers/

Job Title: Intelligence Discipline Lead (IDL) - Subject Matter Expert (SME)

Location: National Capital Region (NCR)

Security Clearance Required: TS/SCI

Job Description: Preting seeks exceptionally qualified individuals to serve as an Intelligence Discipline Lead Subject Matter Expert (IDL SME) to support USSOCOM. IDL SME provides support to assist USSOCOM Staff in the conduct of targeting analysis and operations. The contractor shall provide all necessary specialized non-personal labor, material, and services necessary to perform intelligence operations, coordination, product production, data integration, synchronization, and prioritization of USSOCOM missions and operational objectives.

Employees must maintain global readiness and be available to deploy on a no-notice basis to hazardous duty/combat zones. Deployments may be to a theater of operations with permissive, uncertain, or hostile environments while living in austere conditions for extended periods.

Job Responsibilities: The IDL SME shall provide all necessary specialized non-personal labor, material, and services necessary to perform intelligence operations, coordination, product production, data integration, synchronization, and prioritization of USSOCOM missions and operational objectives. The IDL SME shall possess SME-level skillsets in the specific intelligence discipline with demonstrated experience and results to include knowledge of training requirements, mission requirements, the ability to accurately and effectively communicate with USSOCOM customers and knowledge of the organization. IDL SMEs shall assist the USSOCOM Staff to identify and assist in the development of prudent COAs, recommend

priorities, train members of the team, and employ technical knowledge for the long-term benefit to USSOCOM operations.

Job Requirements: Intelligence Discipline Lead-Subject Matter Expert (IDL SME) shall possess the following qualifications:

- IDL SME shall have a minimum of ten (10) years of experience performing analytical intelligence related operations while serving in an Intelligence Task Force, National Intelligence Support Team, National Military Joint Intelligence Center or Combatant Command, or, a non-DoD equivalent IA operational community.
- Of the foregoing experience, the IDL SME shall have not less than five (5) years of operational analysis experience in their analytical field. Two (2) years of experience in a managerial level position in support of special operations and combat overseas tours with a SMU and or SOF in an operational environment providing a direct analysis support function is highly desired.
- IDL SME shall have advanced skillsets with the F3EAD targeting methodology to include broad knowledge of additional intelligence disciplines and significant demonstrable experience in their field capable of leading analytical efforts culminating in products.
- IDL SME shall have advanced skillsets with the Intelligence Cycle, HVI Targeting, Social Network Analysis, Patterns of Life Analysis and one or more of the following areas: Human Factors Analysis, Human Terrain Analysis, SIGINT Targeting, Convergence Analysis, and Intelligence training.
- IDL SME shall have employed their expert knowledge and understanding of analytical theory, doctrine, rules, regulations, directives, systems, concepts, methodologies and relevant skills related to intelligence operations.
- IDL SME shall have expert knowledge of applying tradecraft, tools, and methods to collect, analysis, and integrate complex information related to targeting.
- Current Top Secret clearance and SCI adjudicated.
- Must possess a valid US passport

Job Description: Preting is seeking qualified individuals to serve as CI/HUMINT Reports Officers at the Senior level to support the Intelligence Services for the CYBERCOM Contract.

Job Responsibilities

- Consolidates relevant and actionable reporting into Intelligence Information Report (IIR) format to meet Command reporting obligations, filling intelligence gaps for the United States Cyber Command (USCYBERCOM) J2, J3 and J5, as well as external members of the Intelligence Community (IC).
- Updates all applicable databases to ensure HUMINT records are accurately documented and maintained in accordance with applicable policies and regulations.
- Drafts and submits evaluations and Source Directed Requirements (SDRs) to collectors to ensure continued and increased collection against and visibility into Command requirements.
- Compiles monthly collection operations management statistics and reporting.
- Maintains responsibility for the consolidation, storage and dissemination of all DoD HUMINT and CI collected malware.
- Maintains the Knowledge Management/Information Technology and Records Management Command requirements for the J2X.
- Manages web portals, information technology needs and applicable records in accordance with regulations.

Required Qualifications

- In-depth knowledge and understanding of the functions and activities of the CI/HUMINT Reports Officer position.
- Possess knowledge and ability to apply Intelligence Community (IC) and DoD classification guidelines and procedures.
- Ability to use logic when evaluating and synthesizing multiple sources of information.
- Demonstrates mastery of qualitative and quantitative analytic methodologies and pursue developments in academia or other fields that affect tradecraft methodology.

- Ability to define comprehensive, new, or unique research approaches that enable rigorous assessments to address and contribute to high-level tasks.
- Experience defending analytic judgements with sound, logical conclusions and adapt analytic judgments when presented with new information, evolving conditions, or unexpected developments.
- Demonstrates in-depth analysis of analytic operations and knowledge management issues across organizational and intra-IC boundaries and clearly articulates key findings.
- Experience in producing timely, logical, and concise analytic reports, documents, assessments, studies, and briefing materials in formats including Microsoft Office tools (e.g. Excel, Word, PowerPoint, etc.), electronic/ soft copy matrices and/ or web-enabled formats.
- Exceptional verbal and non-verbal communication skills and ability to work independently with minimal oversight and direction.
- Proficient in using Microsoft Office tools.
- Experience developing structured research including, but not limited to, obtaining, evaluating, organizing, and maintaining information within security and data protocols.
- Capable of recognizing nuances and resolving contradictions and inconsistencies in information.
- Possess working knowledge using complex analytic methodologies, such as structured analytic techniques or alternative approaches, to examine biases, assumptions, and theories to eliminate uncertainty, strengthen analytic arguments, and mitigate surprise.
- Understanding of intelligence collection capabilities and limitations, to include but not limited to, technical sensors/ platforms and human intelligence sources related to the responsibilities of the CI/HUMINT Reports Officer position.
- Understanding of evaluating collected intelligence reporting, engaging with collection managers, and developing collection requirements.
- Ability to communicate understanding from information that may be incomplete, indirect, highly complex, seemingly unrelated, and / or technically advanced.
- Experience in structuring analysis based on trends in reporting and a range of analytic perspectives from other analysts, organizations, and intelligence disciplines.
- Ability to collaborate and work with other IC members on information sharing, driving collection, and addressing analytic disputes and conflict resolution.

32. Military Historian - Pentagon VA- TS Clearance

We are looking for a Military Historian to work at the pentagon Performing all work with classified documents at the OSD Historical Office, which provides the contractor safe storage for classified documents. Work on manuscript material while it is still classified prior to submission for declassification review by the Department of Defense and other government agencies. Will have access to classified material, including the SIPRNET, JWICS, SCI, NATO, RD/FRD, Q, and CNWDI material, in the OSD Historical Office. Process Information Papers and Historical Research Queries, and conduct research, analyze the material gathered, and write information papers to provide useful historical or analytical insight to officials within the Department of Defense. Also, research and write responses to historical queries from the Congress, other executive branch agencies, the media, and the public.

Qualifications:

Possess at least a master's degree in history, political science, international relations or a closely related field from an accredited university

Must have full-time experience of at least 2 years in the history of the nation's national security policy, conflicts, and foreign affairs, or in governmental affairs. This must include extensive experience conducting research in diplomatic, defense, or military records in official national archives or private repositories in support of a graduate thesis or book.

Have experience writing focused research papers as part of a graduate program and have published at least one article in a professional journal or by a government history office that demonstrates an understanding of diplomatic or national security policy and/or military strategy and operations.

Possess experience in planning and preparing for oral history interviews and using oral history interviews in historical writing projects. Experience is evidenced by formal oral history course work at the graduate level, by conducting oral history interviews in support of a research project, or by at least one year in a position incorporating oral history as a primary duty.

Possess skill and experience in using the Chicago Manual of Style, 17th edition, as evidenced by

completion of at least one published article and a graduate thesis.

Possess effective communications skills, as evidenced by making at least two presentations at professional conferences or teaching at least two college-level courses. Be able to write with correct grammar, effective organization, and readable style. Be able to interact with OSD

personnel at all levels and effectively coordinate with other OSD offices in order to acquire necessary information and provide concise and useful responses to their historical inquiries. Must be able to obtain a TOP SECRET clearance and must be able to obtain and maintain access to SCI, NATO, RD/FRD, CNWDI, and Q information.

35. Cybersecurity Operations Center Analyst - Fayetteville, NC with a TS/SCI clearance

R0130937 Cybersecurity Operations Center Analyst

Booze Allen Hamilton is looking for a Cybersecurity Operations Center Analyst in Fayetteville, NC with a TS/SCI clearance

The Challenge:

Are you ready to take a strategic role in cyber defense? Are you looking for an opportunity to protect critical infrastructure from the constant onslaught of cyber-attacks? If you want to sharpen your skills by analyzing threats in real-time, you want to be a Cybersecurity Operations Center analyst.

As a Cybersecurity Operations Center analyst on our security operations center team, you'll improve tier monitoring strategies and analyze threats, using state-of-the-art tools and platforms. You'll work with the team to comprehend, mitigate, and respond to threats quickly, restoring operations and limiting the impact. You'll manage efforts to figure out just how many systems are affected and assist recovery efforts. You'll combine threat intelligence, event data, and assessments from recent events and identify patterns to understand attackers' goals to stop them from succeeding. This is a great opportunity to continue to build your Cybersecurity skills with hands on experience in threat assessment and incident response. Join us as we protect clients from malicious actors.

Empower change with us.

You Have:

- 5+ years of experience working as a Cybersecurity Analyst
- Knowledge of Security Information Event Management (SIEM) platforms
- Knowledge of network data and analyzing full packet capture
- Ability to analyze network and endpoint logs, conduct incident response, and effectively report incident information to leadership
- TS/SCI clearance

- HS diploma or GED
- 8570 IAT II+ Certification
- 8570 CSSP Analyst or Incident Responder Certification

Nice If You Have:

- Experience with working in a Security Operations Center (SOC) or Regional Cyber Center (RCC)
- Experience in conducting digital forensics
- Experience with using endpoint tools to successfully hunt for adversarial behavior
- Knowledge of Splunk and creating Splunk content, including alerts and dashboards
- Knowledge of conducting Threat Hunting using network and host-based information
- Bachelor's degree
- Certification in Security Tools, including Splunk, Tanium, or Tychon

Clearance:

Applicants selected will be subject to a security investigation and may need to meet eligibility requirements for access to classified information; TS/SCI clearance is required.

Build Your Career:

Rewarding work, fun challenges, and a ton of investment in our people—that's Booz Allen cyber. When you join Booz Allen, we'll help you develop the career you want.

Competitions — From programming competitions at our PyNights (Python competition and learning events) to competing in CTFs, we've got plenty of chances for you to show off your skills.

Paid Research — Have an innovative idea to explore or hypothesis to test? You can participate in challenges via our crowdsourcing platform, the Garage, and other programs to be awarded dedicated time and/or funding to advance your skills.

Cyber University — CyberU has more than 5000 instructor-led and self-paced cyber courses, a free online library that you can access from just about anywhere—including your phone—and certification exam prep guides that include practical assessments to prepare you for your exam.

Academic Partnerships — In addition to our tuition reimbursement benefit, we've partnered with University of Maryland University College to offer two graduate certificate programs in cybersecurity—fully funded without a tuition cap.

Maker/Hackerspaces — Race drones, print 3D gadgets, drink coffee from our Wi-Fi coffee maker, and get hands-on training on tools and tech from in-house experts in our dedicated maker and hackerspaces.

38. JSOC J8 User Experience/User Interface (UX/UI) Designer (Fort Bragg, NC) (TS/SCI) (RDR, INC)

Job Responsibilities

Work as a talented UX/UI designer on a multi-disciplinary team, able to support analytic and application development projects by translating user research and requirements into an outstanding user experience through discovery, ideation, UI design, wireframe development, prototyping, and testing.

Collaborate closely with users, along with process and data analysis team members, and project leads to help identify key priorities and opportunities based on qualitative and quantitative user insights.

Assess and capture user needs and evaluate feedback to create UX concept and strategy.

Plan and conduct user interviews and usability tests to rapidly test and iterate designs, presenting data and feedback to the team in regular intervals as a key component of the development process.

Apply user-centered design methodologies to ensure requirements, features and designs support user needs and project priorities.

Translate and prioritize discovered needs into clear user stories and user/process flows which demonstrate and capture the requirements into suitable and sufficient proposed solutions.

Effectively explore and communicate design ideas using sketches, journey maps, flow diagrams, wireframes, and prototypes with users and work closely with a cross-functional team to develop and build out functional experiences.

Create innovative visual design solutions to UX/UI and interaction challenges incorporating modern design standards.

Create and maintain design systems and interaction libraries for reuse and commonality across experiences, interfaces, and applications.

Be a key user advocate and help the team improve user-centered design approaches across all project and development efforts.

Qualifications

Required

Minimum of 2 years hands-on UX/UI experience designing web or application experiences and interfaces and conducting user research and testing. Provide portfolio examples and/or stories to show and demonstrate proficiency of design theories and principles, and the impact of your work.

Expertise in producing high fidelity wireframes, including experience with Adobe XD and Illustrator. Experience with other prototyping tools (e.g, Axure RP, UXPin, Figma, Sketch, etc) also acceptable.

Desired

UX certification (Nielsen Norman, General Assembly, HFI, Career Foundry, etc).

Experience with projects involving large and complex datasets, with data visualization and dashboard composition, and working with data scientists and engineers.

Familiarity with python, Dash/Flask, HTML, CSS, JavaScript, or JS frameworks.

Skills

Excellent visualization, verbal, and written communication skills.

Expertise in creating compelling visual designs with engaging compositions that simplify actions and enhance and guide user behavior.

Expertise in communicating with users, gathering and refining user requirements, presenting design ideas, receiving and incorporating feedback, and explaining concepts and prototypes.

Demonstrated ability to break down complex problems and UX/UI challenges into overarching and incremental user-centered solutions.

Experience with a wide range of tools, and willingness to adapt to new tools as needed.

Strong multi-tasking and organization skills to stay on track in a fast-paced and dynamic environment.

Security Clearance: This position requires a DOD TS clearance with SCI eligibility. The government is willing to consider very qualified applicants with a Secret clearance.

44. Cloud Solutions Architect, Senior– Fayetteville, NC – TS/SCI Clearance

R0135214 Cloud Solutions Architect, Senior (Open)

Booz Allen Hamilton is looking for a Cloud Solutions Architect, Senior – Fayetteville, NC – TS/SCI Clearance

Job Description Summary

Assists in the design, definition, development, and testing of cloud solution components; serves as a liaison between clients and developers to ensure that all infrastructure requirements are met. Applies leading-edge principles, theories, and concepts; contributes to the development of new principles and concepts. Works on unusually complex problems and provides highly innovative solutions. Operates with substantial latitude for unreviewed action or decision; mentors or supervises employees in both firm and technical competencies. Bachelors degree and 8+ years of directly related experience. Years of experience may be accepted in lieu of degree for certain roles. Certifications may be accepted in lieu of a degree for certain technical roles.

The Challenge:

Everyone is trying to “harness the power of the cloud,” but not everyone knows how. As a cloud architect, you know how to build a cloud based technical architecture that meets customer

needs and takes advantage of cloud capabilities. We need you to help us develop cloud-based solutions to some of the DoD's toughest challenges.

As a cloud architect on our team, you'll lead the way in innovative solutions across Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), and private cloud solutions that will better enable the warfighter to turn data into decisions. You'll also tackle enterprise problems around security, connectivity, and operations. You'll recommend tools and capabilities based on your research of the current environment and knowledge of various on premise, cloud based, and hybrid resources. You'll lead your team as they help the customer overcome their most difficult challenges in the cloud. Your technical expertise will be vital as you work with customers, stakeholders, and multi-functional teams to ensure standards are met throughout the cloud migration process. This is an opportunity to use the latest cloud technologies as you look for ways to improve your customer's environment using current cloud capabilities.

You Have:

- 5+ years of experience in working with large IT enterprise
- 5+ years of experience with troubleshooting very complex distributed environments
- 1+ years of experience with a public cloud provider, including AWS, Azure, or GCP
- 1+ years of experience in working with cloud compute architectures in virtual solutions, including network, compute, or storage and securing those virtual solutions
- Experience with IaaS and PaaS technologies
- Experience in UNIX and Linux environments
- Knowledge of modern cloud native application patterns, practices, and platforms
- Knowledge of end-to-end modern agile software development
- TS/SCI clearance
- HS Diploma or GED

Nice If You Have:

- Experience with coding or scripting to automate workflows
- Experience with CLI and leveraging Cloud APIs
- Experience with troubleshooting very complex distributed environments
- Knowledge of containerization
- Ability to work with leadership, functional groups, and development teams
- Ability to work independently under general direction
- Possession of excellent oral and written communication skills
- DoD 8570 Certification
- Cloud Certification

Clearance:

Applicants selected will be subject to a security investigation and may need to meet eligibility requirements for access to classified information; TS/SCI clearance is required.

Build Your Career:

When you join Booz Allen, you'll have the opportunity to connect with other professionals doing similar work across multiple markets. You'll share best practices and work through challenges as you gain experience and mentoring to develop your career. In addition, you will have access to a wealth of training resources through our Engineering & Science University, an online learning portal where you can access more than 5000 tech courses, certifications and books. Build your technical skills through hands-on training on the latest tools and tech from our in-house experts. Pursuing certifications that directly impact your role? You may be able to take advantage of our tuition assistance, on-site courses, vendor relationships, and a network of experts who can give you helpful tips. We'll help you develop the career you want as you chart your own course for success.

Please send resumes to Nolan Franck at franck_nolan@ne.bah.com

45. Senior Project Manager - Integrated Resource Planning - Colorado Springs, CO

Pay Range

\$122,400 to \$144,000

Location

Colorado Springs, CO

Date First Posted

6/2/22

Senior Project Manager - Integrated Resource Planning

Who We Are...

Colorado Springs Utilities is a four-service municipal utility with a 100-year reputation for providing reliable water, wastewater, gas, and electric services to the Pikes Peak Region. Nestled at the base of the Rocky Mountains, Colorado Springs is recognized for providing the perfect blend of mountain and city living. Our company promotes a work culture dedicated to innovation and collaboration; encouraging our employees to provide safe, reliable, and competitively priced energy for the generations to come.

Our Energy Planning and Innovation team is hiring a Senior Project Manager to provide advanced-level project management leadership in the evaluation, planning, and delivery of integrated resource plans for electric, distributed energy resources, and gas supply and generation. Your role will be pivotal in directing, facilitating, and/or managing these projects (some spanning over the next 30 years).

Responsibilities may include:

Leads the Electric Integrated Resource Planning project team by assembling appropriate technical personnel and assigning roles and responsibilities.

Lead the project team's delivery of integrated master and resource plans on a twenty to thirty-year planning horizon for multiple energy disciplines including gas and electric supply and generation.

Participate in long-term, strategic Gas and Electric Integrated Resource Planning processes in order to support system plans, system resource adequacy, and delivery.

Collaborates with project sponsors and operating departments to identify project objectives, milestones, resource requirements, and deliverables.

Guides and performs strategic analysis for projects with stakeholders including our Electric strategic initiatives around Energy Markets and Transmission, Grid Modernization, Integrated Asset Management, Grid-Scale Distributed Energy and Storage, Sustainable Energy Plan, and Comprehensive Integrated Resources Plan.

Initiates, plans, develops and implements system resource adequacy by participating in the long-term, strategic Gas and Electric Integrated Resource Planning processes.

Directs project meetings and resolves conflicts while gaining team member commitment to project assignments including operations, demand-side management, energy supply, fuel supply, transmission, and finance to develop modeling assumptions and analytical methodology.

Initiates procurement of materials, resources, equipment, and services (i.e., consultant and construction contracts, permitting, inspections, etc.).

Develops, negotiates, and manages contracts with outside consultants to develop necessary studies that will advance the transition toward cleaner energy.

Tracks, monitors, analyzes, and reports projects' costs, schedule, and scope status (PPTS).

Establishes and monitors project budgets; approves expenditures within limits of budgets.

Drives timely project activities, as well as efficient and cost-effective use of time, materials, and resources.

Identifies, assesses, and resolves critical and potential problems to meet project objectives/deliverables.

Supports and educates internal stakeholders including management, Compliance, Operations, and other departments on resource planning aspects and challenges.

Determines necessary changes or deviations to the project plan.

Prepares formal and informal project communications.

Coordinates close-out activities at project completion.

Who you are...

A bachelor's degree in engineering, project management, business, or related field is highly preferred.

Project Management Professional (PMP) certification is highly beneficial

Qualified candidates will offer 9+ years of demonstrated experience managing high-level, advanced projects, utilities preferred. Knowledge of electric and natural gas infrastructure resource planning is highly preferred.

Understanding of Energy Markets and Resources.

Previous experience with the development and delivery of Energy Resource Plans.

Must have a sound understanding of the principles of electricity generation, transmission, distribution, and infrastructure.

Must be a strong team player who recognizes how their decisions may impact others and seeks input from other stakeholders across the organization.

The military job codes/duty codes most closely related to this role are: 120A, 12A, 12B, 12N, 51S, 881A, 32E1, 32E2, 32E3, 32E4, 32EX, 5311, 5904, 5310, 122, 5960, 8004, 144, 4071

Our Commitment to our Employees...

Our people are the heart and soul of Colorado Springs Utilities. They keep the lights on, gas flowing, water coming in, and wastewater leaving. We do not just say people are important – we prove it! That's why we are honored to invest in protecting the health and financial security of our employees and their families through our rich benefits program.

Time Off – Because everybody needs time off to recharge

Vacation – New employees accrue 13 days of paid time off to start, while our more tenured employees accrue 24 days per year

Personal Leave –3 days per year of personal leave

Paid Holidays –10 paid holidays per year

Sick Leave – Accrue 12 days of sick leave annually for those days when you or a family member is feeling under the weather

Vacation Buy – Purchase up to 40 hours of additional vacation time

Pension Plan – Looking forward to a comfortable lifestyle once you're done working? The Colorado Public Employees' Retirement Association (PERA) provides you with retirement benefits and peace of mind when you retire

Medical – Select from three comprehensive medical plans, starting at \$10.30 a month.

Employees also enjoy access to a Health Savings Account (HSA) and Flexible Spending Account (FSA)

Wellness Program – Voluntary wellness program that allows you and your spouse to each earn up to \$500 to use towards healthcare expenses, \$100 in Visa gift cards, and up to \$400 in gym membership reimbursements

Dental – Select from two dental plans, with in-network preventive care covered at 100%

Vision – Voluntary plan that covers full vision care services and discounts on LASIK eye surgery

Retirement Saving Programs – Supplement your pension plan with voluntary retirement programs such as the PERAPlus 401(k) and MissionSquare's Roth IRA and 457 plans.

Disability Coverage –Short-Term (STD) and Long-Term Disability (LTD) insurance available for purchase

Employee Assistance Program (EAP) – Makes the going a little easier by aiding with mental health, stress management, work-life balance, financial and legal matters, and much more

Long-Term Care Insurance – Whether it's due to an accident or a serious illness, LTC insurance is available for purchase to help you and your loved ones

Life Insurance –Company-paid life insurance and supplemental coverage are available

ATTENTION:

All positions will be posted for a minimum of 5 calendar days.

Starting pay will be determined at the time of offer based on the experience, education, and training of the successful candidate.

Colorado Springs Utilities does not sponsor work visas of any kind (including but not limited to F-1, H-1B, or TN visas). Eligible applicants must be authorized to work in the United States.

Colorado Springs Utilities is an Equal Employment Opportunity/Affirmative Action employer.

Our differences make us richer. Learning and growing from one another makes us more than what we were. We want our workforce to be as diverse as our business and recognize the limitless benefits of this commitment. Our desire is to have the organization reflect the diversity of the Pikes Peak Region. As an Equal Employment Opportunity employer, it is our commitment that no person shall be unlawfully discriminated against because of race, color, national origin or ancestry, sex, age, religious convictions, veteran status, disability, political beliefs, sexual orientation, or gender identity. Affirmative Action is Colorado Springs Utilities' effort to ensure

positive steps are taken to have a representative workforce reflective of the relevant available labor force.
