— Infected_Heart's Commission Sheet —

Step 1

Message me

Discord (Infected_Heart#3237)

Twitter (twitter.com/heart_infected)

Email (timtimothy000@gmail.com)

Be sure to include all the info you can (character, positions, any references you may have), even tertiary info may help me in the long run

Step 2

I'll **respond** either quoting you a price or working with you for clarification or issues

To see a list of the 3D models I have check -> [Infected_Heart's 3D Model List](#) <-

this list is not comprehensive so feel free to reach out if you want an animation but don't see the model on there

Step 3

Once we agree on everything you will need to provide part of the cost up front. For commissions under \$50 I require the full payment upfront, for over \$50 I only require half upfront and for anything over \$200 we can discuss breaking it into more parts but I require \$100 as an initial payment. Once I receive the initial payment the animation goes on my to do list.

If paying in segments you won't receive the full HD version, any alts or be allowed to commission any other pieces until I receive the remainder of the current/last commission.

All payment goes through my [linktree](#) (there is a paypal option once you type in the amount)

Optional

Revisions - I allow two free revisions for completed works or pre final render WIPs, not counting animation errors or changes to portions not yet started. If you would still like changes after this I will be forced to charge in proportion to the extent of the revisions. Revisions can include changing of timing, sfx, certain camera angles, minor pose adjustments, but not full remakes or new poses.

WIPs - I generally dislike WIPs beyond a few screenshots for pose checks, but they may be provided if asked and depending on the level of WIP required.

Alts - Alternate versions of an animation can be commissioned depending on the model(s) used, generally pertaining to the clothing styles of the characters. Alt possibilities should be discussed prior to starting the commission but can be made for past animations for a slight extra fee.

Upgrades - Adding additional scenes/lengthening a previous commission or video can be commissioned depending on the video but newer work/upgrading works in progress is preferred to changing past commissions.

Custom Model Making

Creating an animation ready 3D model. Due to the variable nature of character design it is recommended to receive a direct quote on modeling services, however expect \$200+ for custom character models. Characters will be delivered in an animation ready Blend file.

Model Edits

Edits can be made to preexisting models, refining, polishing, adding new features, clothed etc depending on need. Often cheaper than complete model making if the character is similar to persistent models or has regular anatomy.
